This specification is subject to change without notice.
Consult Kyocera before ordering.

Warning

1. This Kyocera LCD module has been specifically designed for use only
   in electronic devices and industrial machines in the area of audio control,
   office automation, industrial control, home appliances, etc. The module
   should not be used in applications where the highest level of safety and
   reliability are required and module failure or malfunction of such module
   results in physical harm or loss of life, as well as enormous damage or loss.
   Such fields of applications include, without limitation, medical, aerospace,
   communications infrastructure, atomic energy control. Kyocera expressly
   disclaims any and all liability resulting in any way to the use of the module
   in such applications.

2. Customer agrees to indemnify, defend and hold Kyocera harmless from
    and against any and all actions, claims, damages, liabilities, awards,
    costs and expenses, including legal expenses, resulting from or arising out of
    Customer's use, or sale for use, or Kyocera modules in applications.

Caution

1. Kyocera shall have the right, which Customer hereby acknowledges, to
   immediately scrap or destroy tooling for Kyocera modules for which no
   Purchase Orders have been received from the Customer in a two-year
   period.

1. Application

This data sheet defines the specification for a (640×R.G.B) ×240 dot, amorphous silicon TFT transflective color dot matrix type Liquid Crystal Display with LED backlight. 『RoHS Compliant』

## 2. Construction and Outline

(640×R.G.B) ×240 dots, COG type LCD with LED backlight.

Backlight system   : Side-edge type (LED).

Polarizer   : Glare treatment.

Additional circuits : Timing controller, Power supply (3.3V input)

This drawing is showing conception only.

3．Mechanical Specifications

ITEM	SPECIFICATION	UNIT
Outline dimensions	174.2 (W) × 73.4 (H) × 12.2 (D)	mm
Effective viewing area	149.8 (W) × 57.4 (H)	mm
Dot number	(640×R.G.B) (W) × 240 (H)	Dots
Dot pitch	0.077 (W) × 0.231 (H)	mm
Display mode　　*1	Normally white	－
Mass	(TBD)	g

*1 Due to the characteristics of the LCD material, the color vary with environmental temperature.

4．Absolute Maximum Ratings

4-1. Electrical absolute maximum ratings

ITEM	SYMBOL	Min.	Max.	UNIT
Power input voltage	VDD	0	4.0	V
Input signal voltage　　*1	Vin	−0.3	6.0	V
Forward current　　*2	IF	－	(17)	mA

*1 Operating temperature means a temperature which operation shall be guaranteed.
    Since display performance is evaluated at 25℃, another temperature range should be confirmed.

*2 Temp. = −30 ℃ < 48 h , Temp = 80 ℃ < 168 h
    Store LCD panel at normal temperature/humidity.
    Keep it free from vibration and shock.
    LCD panel that is kept at low or high temperature for a long time can be defective due to
    the other conditions, even if the temperature satisfies standard.
    (Please refers to 12. Precautions for use as detail).

*3 Non-condensation.

*4 Temp. ≦ 40℃, 85%RH Max.
    Temp. > 40℃, Absolute Humidity shall be less than 85% RH at 40℃.

＊ A forward current below 8.0mA may reduce the brightness uniformity of the LED backlight.
  This is because the amount of light from each LED chip is different. Therefore, please
  evaluate carefully before finalizing the input current.

11. Warranty

11-1. Incoming inspection
Please inspect the LCD within one month after your receipt.

11-2. Production Warranty
Kyocera warrants its LCDs for a period of 12 months after receipt by the purchaser, and within the limits specified. Kyocera shall, by mutual agreement, replace or rework defective LCDs that are shown to be Kyocera's responsibility.

12. Precautions for use

12-1. Installation of the LCD
1. The LCD's bezel must be grounded. The heat sink and shield cover are connected at the ground hole. The ground hole is located on the right side of the LCD when viewed from the front. The ground hole must be connected to an external ground.
2. A transparent protection sheet shall be added to protect the LCD and its polarizers.
3. The LCD shall be installed so that there is no pressure on the LSI chips.
4. The LCD shall be installed flat, without twisting or bending.
5. The display window size should be the same as the effective viewing area.
6. In case you use outside frame of effective viewing area as outward appearance of your product, unevenness of its outward appearance is out of guarantee.
7. Please refer to the following our recommendable value of Clamp-down torque when installing. Clamp-down torque:0.265±-0.025N.m Please set up'SPEED-LOW', 'SOFT START-SLOW' when using electric driver .
   Recommendable screw JIS tapping screw two types nominal dia.3.0mm
   installing boss hole depth 4.2±0.5mm
   Please be careful not to use high torque which may damage LCD module in installation.
8. A transparent protection sheet is attached to the polarizer. Please remove the protection film slowly before use, paying attention to static electricity.
9. This Kyocera LCD module has been specifically designed for use in general electronic devices, but not for use in a special environment such as usage in an active gas.
   Hence, when the LCD is supposed to be used in a special environment, evaluate the LCD thoroughly beforehand and do not expose the LCD to chemicals such as an active gas.

12-2. Static Electricity
1. Since CMOS ICs are mounted directly onto the LCD glass, protection from static electricity is required. Operator should wear ground straps.

12-3. LCD Operation
1. The LCD shall be operated within the limits specified. Operation at values outside of these limits may shorten life, and/or harm display images.
2. Operation of the LCD at temperature below the limit specified may cause image degradation and/or bubbles.
   It may also change the characteristics of the liquid crystal.
   This phenomenon may not recover. The LCD shall be operated within the temperature limits specified.

12-4. Storage
1. The LCD shall be stored within normal temperature and humidity.
   Store in a dark area, and protected the LCD from direct sunlight or fluorescent light.
2. The LCD should be packaged to prevent damage.

12-5. Screen Surface
 1. <u>DO NOT</u> store in a high humidity environment for extended periods. Polarizer degradation
    bubbles, and/or peeling off of the polarizer may result.
 2. The front polarizer is easily scratched or damaged. Prevent touching it with any hard material,
    and from being pushed or rubbed.
 3. The LCD screen may be cleaned by wiping the screen surface with a soft cloth or cotton pad
    using a little Ethanol.
 4. Water may cause damage or discoloration of the polarizer. Clean condensation or moisture from
    any source immediately.
 5. Always keep the LCD free from condensation during testing. Condensation may permanently spot
    or stain the polarizer.
 6. Do not pull the LED cable and do not bend the root of the wires. Housing should be designed
    to protect LED cable from external stress.
 7. Do not disassemble LCD module because it will result in damage.
 8. Please do not use solid-base image pattern for long hours because a temporary afterimage may
    appear. We recommend using screen saver etc. in cases where a solid-base image pattern must
    be used.
 9. Liquid crystal may leak when the module is broken. Be careful not to let the fluid go into
    your eyes and mouth. In the case the fluid touches your body; rinse it off right away with
    water and soap.

１３．Reliability Data / Environmental Test

 ＊Each test item uses a test LCD only once. The tested LCD is not used in any other tests.
 ＊The LCD is tested in circumstances in which there is no condensation.
 ＊The reliability test is not an out-going inspection.
 ＊The results of the reliability test are for your reference purpose only.
   The reliability test is conducted only to examine the LCD's capability.

Definition of Inspection item	Dot defect	Bright dot	Defect constantl yappears bright, even in display of all "Black" pixels. Count : Visible though 5% transparency o f filter. No count : Not visible though 5% trans -parency of filter.

		Black dot	Defect constantly appears black, even in "White" pixels, Size is based on bright dot.
		Two dots join	Dot join defect is defined as two or more dots which always display a matching brightness, even when each of them is set to different brightness value. <table><tr><td>R</td><td>G</td><td>B</td><td>R</td><td>G</td><td>B</td><td>R</td><td>G</td><td>B</td></tr><tr><td>R</td><td>G</td><td>B</td><td>R</td><td>G</td><td>B</td><td>R</td><td>G</td><td>B</td></tr><tr><td>R</td><td>G</td><td>B</td><td>R</td><td>G</td><td>B</td><td>R</td><td>G</td><td>B</td></tr></table> □ dot defect As the above shows, two dot join is defined as defects of two adjoing dots like 'R' and 'G'.
	External inspection	Bubble, Scratches, Foreign particle (Polarizer, Cell, Backlight)	Visible operating (all pixcels "Black" or "White") and non operating.
	Others	CFL lead wires	Damaged CFL lead wires, functional failure, appearance failure.
	Definition of size	Definition of circle size $$d = \frac{(a+b)}{2}$$	Definition of linear size

2) Standard

Classification	Inspection item		Judgement standard	
Dot defect	Bright dot		Acceptable number : 4 bright dots Bright dot spacing : 5 mm or more	
	Black dot		Acceptable number : 5 black dots Black dot spacing : 5 mm or more	
	2 dots join	Bright dot	Acceptable number : 2	
		Black dot	Acceptable number : 3	
	3 or more dots join		Acceptable number : 0	
	Total dot defects		Acceptable number : 5 Max	

White dot, Black dot (Circle):

Size(mm)	Acceptable Number
d<0.2	(neglected)
0.2<d≦0.4	5
0.4<d≦0.5	3
0.5<d	0

External inspection — Polarizer(Scratches):

Width(mm)	Length(mm)	Acceptable Number
W≦0.1	–	(neglected)
0.1<W≦0.3	L≦5.0	(neglected)
	5.0<L	0
0.3<W	–	0

Polarizer (Bubble, Dent):

Size(mm)	Acceptable Number
d<0.2	(neglected)
0.2<d≦0.3	5
0.3<d≦0.5	3
0.5<d	0

Foreign Particle(Circular shape):

Size(mm)	Acceptable Number
d<0.2	(neglected)
0.2<d≦0.4	5
0.4<d≦0.5	3
0.5<d	0

Foreign Particle(Linear shape),Scratches:

Width(mm)	Length(mm)	Acceptable Number
W≦0.03	–	(neglected)
0.03<W≦0.1	L≦2.0	(neglected)
	2.0<L≦4.0	3
	4.0<L	0
0.1<W	–	(According to Circular shape)
