# 1. GENERAL DESCRIPTION

#### 1.1 OVERVIEW

V296W1- L11 is a 30" TFT Liquid Crystal Display module with 16-CCFL Backlight unit and 1ch-LVDS interface. This module supports 1280 x 768 WXGA format and can display true 16.7M colors (8-bit/color). The inverter module for backlight is built-in.

#### 1.2 FEATURES

- -Ultra wide viewing angle Super MVA technology
- -High brightness (550 nits)
- High contrast ratio (800:1)
- Fast response time
- High color saturation NTSC 75%
- WXGA (1280 x 768 pixels) resolution
- DE (Data Enable) only mode
- LVDS (Low Voltage Differential Signaling) interface

#### 1.3 APPLICATION

- TFT LCD TVs

#### 1.4 GENERAL SPECIFICATIONS

Item	Specification	Unit	Note
Active Area	643.2(H) x 385.92 (V) (29.53" diagonal)	mm	(1)
Bezel Opening Area	648.8 (H) x 391.52 (V)	mm	(1)
Driver Element	a-si TFT active matrix	-	-
Pixel Number	1280 x R.G.B. x 768	pixel	-
Pixel Pitch (Sub Pixel)	0.1675 (H) x 0.5025 (V)	mm	-
Pixel Arrangement	RGB vertical stripe	-	-
Display Colors	16.7M	color	-
Display Operation Mode	Transmissive mode / Normally black	-	-
Surface Treatment	Anti-glare with anti-reflective coating Hard coating (2H), Haze : 40% Reflection rate : < 2%	-	-

#### 1.5 MECHANICAL SPECIFICATIONS

	Item	Min.	Тур.	Max.	Unit	Note
	Horizontal(H)		683.6		mm	
Module Size	Vertical(V)		433.6		mm	(1), (2)
	Depth(D)	-		43	mm	
	Weight	-	5500		g	-

Note (1) Please refer to the attached drawings for more information of front and back outline dimensions.

Note (2) Module Depth does not include connectors.

Approval

#### 2. ABSOLUTE MAXIMUM RATINGS

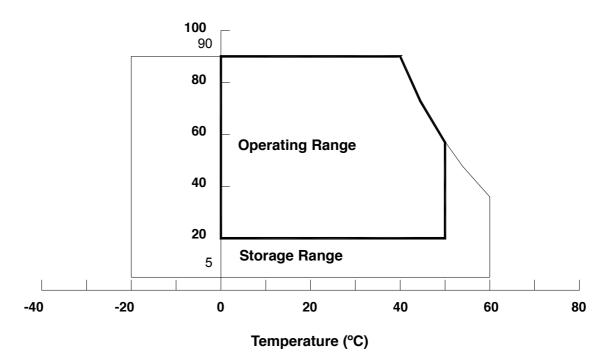

#### 2.1 ABSOLUTE RATINGS OF ENVIRONMENT

Item	Symbol	Va	Unit	Note	
item	Symbol	Min.	Max.	Offic	Note
Storage Temperature	T <sub>ST</sub>	-20	+60	°C	(1)
Operating Ambient Temperature	T <sub>OP</sub>	0	+50	°C	(1), (2)
Shock (Non-Operating)	S <sub>NOP</sub>	-	100	G	(3), (5)
Vibration (Non-Operating)	$V_{NOP}$	-	1.0	G	(4), (5)

Note (1) Temperature and relative humidity range is shown in the figure below.

- (a) 90 %RH Max. (Ta  $\leq$  40 °C).
- (b) Wet-bulb temperature should be 39 °C Max. (Ta > 40 °C).
- (c) No condensation.
- Note (2) The maximum operating temperature is based on the test condition that the surface temperature of display area is less than or equal to 60 °C with LCD module alone in a temperature controlled chamber. Thermal management should be considered in your product design to prevent the surface temperature of display area from being over 60 °C. The range of operating temperature may degrade in case of improper thermal management in your product design.
- Note (3) 2 ms, half sine wave, 1 time for  $\pm X$ ,  $\pm Y$ ,  $\pm Z$ .
- Note (4) 10 ~ 500 Hz, 10 min, 1 time each X, Y, Z.
- Note (5) At testing Vibration and Shock, the fixture in holding the module has to be hard and rigid enough so that the module would not be twisted or bent by the fixture.

# **Relative Humidity (%RH)**

Approval

#### 2.2 ELECTRICAL ABSOLUTE RATINGS

# 2.2.1 TFT LCD MODULE

Item	Symbol	Va	lue	Unit	Note
item	Cymbol _	Min.	Max.	01111	11010
Power Supply Voltage	Vcc	-0.3	+6.0	V	(1)
Logic Input Voltage	$V_{IN}$	-0.3	4.3	V	(1)

#### 2.2.2 BACKLIGHT UNIT

Item	Symbol	Test Condition	Min.	Туре	Max.	Unit	Note
Lamp Voltage	$V_W$	Ta = 25 ℃	1	_	3000	$V_{RMS}$	
Input Voltage	$V_{BL}$	_	0	_	30	V	(1), (2), I <sub>L</sub> = 4.5 mA
On/Off Control Voltage	$V_{BLON}$	_					
Internal/External PWM Select Voltage	$V_{SEL}$	_	-0.3	_	7	V	(1) (2)
Internal PWM Control Voltage	$V_{IPWM}$	_	-0.3		,	v	(1), (2)
External PWM Control Voltage	$V_{EPWM}$	_					
Operating Temperature	T <sub>OP</sub>	5∼95% RH	0	_	75	°C	(3)
Storage Temperature	$T_{ST}$	5∼95% RH	-30	_	80	°C	(3)

Note (1) Permanent damage to the device may occur if maximum values are exceeded. Function operation should be restricted to the conditions described under Normal Operating Conditions.

Note (2) Specified values are for lamp and inverter (Refer to 3.2 for further information).

Note (3) Protect inverters from moisture condensation and freezing.

# 3. ELECTRICAL CHARACTERISTICS

# 3.1 TFT LCD MODULE

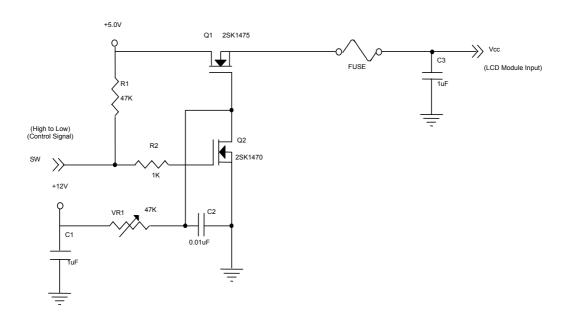

Ta = 25 ± 2 °C

Parame	tor	Symbol		Value		Unit	Note
Parame	i arameter		Min.	Тур.	Max.	Offic	NOLE

Lamp Current	Ι <sub>L</sub>	4.2	4.5	4.8	mA <sub>RMS</sub>	(1)		
Open Lemp Veltage	\ \/	1560	-	3000	$V_{RMS}$	(2), Ta = 25 °C		
Open Lamp Voltage	Vs	1870	-	3000	$V_{RMS}$	(2), Ta = 0 °C		
Oscillating Frequency	F <sub>W</sub>	57	60	63	KHz	(3)		
Lamp Life Time	$L_BL$	50K	_	_	Hrs	(5)		

Note (1) Lamp current is measured by utilizing high frequency current meters as shown below:

The information described in this technical specification is tentative and it is possible to be changed without prior notice. Please contact CMO 's representative while your product design is based on this specification. **Version 2.1** 

Approval

- Note (2) The open lamp voltage  $V_S$  should be applied to the lamp for more than 1 second after startup. Otherwise the lamp may not be turned on.
- Note (3) The lamp frequency may produce interference with horizontal synchronous frequency from the display, and this may cause line flow on the display. In order to avoid interference, the lamp frequency should be detached from the horizontal synchronous frequency and its harmonics as far as possible.
- Note (5) The life time of a lamp is defined as the time in which it continues to operate under the condition Ta =  $25 \pm ^{\circ}$ C and I<sub>L</sub> =  $4.2 \sim 4.8$  mArms until one of the following events occurs:
  - (a) When the brightness becomes equal or less than 50% of its original value.
  - (b) When the effective discharge length becomes equal or lower than 80% of its original value. (Effective discharge length is defined as an area that has equal or more than 70% brightness compared to the brightness at the center point.)
- Note (6) The waveform of the voltage output of inverter must be area-symmetric and the design of the inverter must have specifications for the modularized lamp. The performance of the Backlight, such as lifetime or brightness, is greatly influenced by the characteristics of the DC-AC inverter for the lamp. All the parameters of an inverter should be carefully designed to avoid producing too much current leakage from high voltage output of the inverter. When designing or ordering the inverter please make sure that a poor lighting caused by the mismatch of the Backlight and the inverter (miss-lighting, flicker, etc.) never occurs. If the above situation is confirmed, the module should be operated in the same manners when it is installed in your instrument.
- Note (7) The power source capacity should be 3 times of inverter total power consumption P<sub>BL</sub> or higher, and add an 0.1uf ceramic capacitor and an 1000uf aluminum capacitor or equivalent which should be paralleled between V<sub>BL</sub> and ground of input connector in case of inverter malfunction.
- Note (8) Requirements for a system inverter design, which is intended to have a better display performance, a better power efficiency and a more reliable lamp, are following. It shall help increase the lamp lifetime and reduce leakage current.
  - a. The asymmetry rate of the lamp current waveform should be less than 5%.
  - b. The crest factor of lamp current waveform should be within 1.414 to 1.7.
  - c. Inverter output waveform had better be more similar to ideal sine wave.

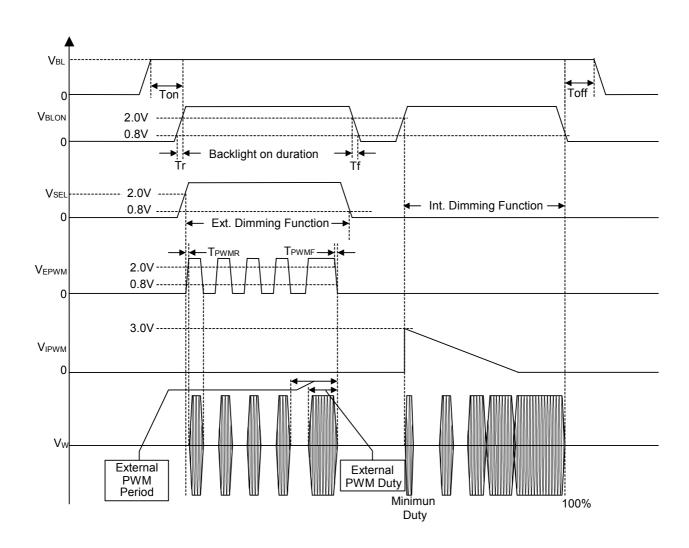

Approval

BLON Off Time		T <sub>OFF</sub>	_	500	_	_	mS	

- Note (1) Permanent damage to the device may occur if interface impedance are exceeded above definition.
- Note (2) All the interface circuits without spike suppress component hence the hot plug in or plug out of all connectors are inhibited.
- Note (3) External PWM control signal (E\_PWM) should be connected to low in case internal PWM was selected. (SEL = low). Internal PWM control signal (I\_PWM) should be connected to ground in case external PWM was selected. (SEL = high), Floating of any control signal is not allowed.
- Note (4) For dimming control function operation chart was shown as below.
- Note (5) The power on sequence was defined as following. Before BLON signal raised, the input power  $V_{BL}$  shall maintain a BLON Delay Time ( $T_{on}$ ) time in advance.

# 6. INTERFACE TIMING

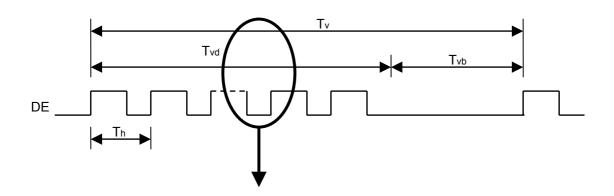

# 6.1 INPUT SIGNAL TIMING SPECIFICATIONS

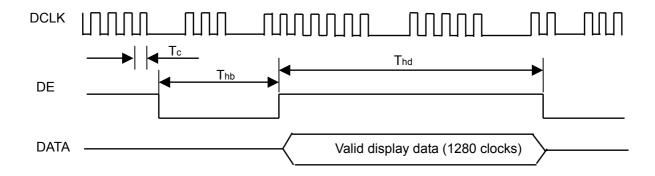

The input signal timing specifications are shown as the following table and timing diagram.

Signal	Item	Symbol	Min.	Тур.	Max.	Unit	Note	
Clock	Frequency	1/Tc	62	81	82	MHZ	-	
Vertical Active Display Term	Frame Rate	Fr	-	60	64	Hz	Tv=Tvd+Tvb	
	Total	Tv	780	806	850	Th	-	
	Display	Tvd	768	768	768	Th	-	
	Blank	Tvb	12	38	82	Th	-	
Horizontal Active Display Term	Total	Th	1450	1688	2000	Tc	Th=Thd+Thb	
	Display	Thd	1280	1280	1280	Tc	-	
	Blank	Thb	170	408	720	Tc	-	

Note: Because of this module is operated by DE only mode, Hsync and Vsync input signals should be set to low logic level or ground. Otherwise, this module would operate abnormally.

# **INPUT SIGNAL TIMING DIAGRAM**

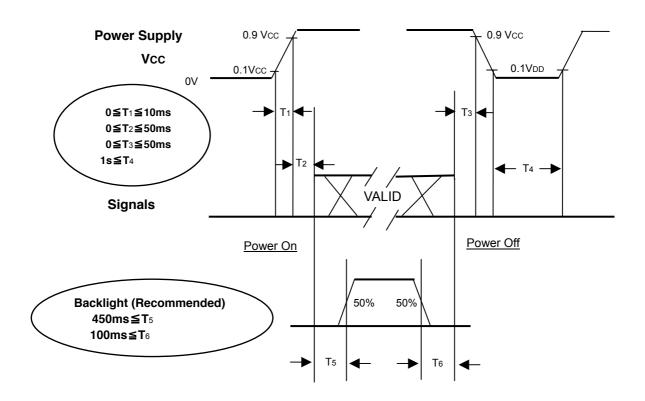

Model No.: V296W1

Approval

#### 6.2 POWER ON/OFF SEQUENCE

To prevent a latch-up or DC operation of LCD module, the power on/off sequence should be as the diagram below.

**Power ON/OFF Sequence** 

# Note.

- (1) The supply voltage of the external system for the module input should be the same as the definition of Vcc.
- (2) Apply the lamp voltage within the LCD operation range. When the backlight turns on before the LCD operation of the LCD turns off before the backlight turns off, the display may momentarily become abnormal screen.
- (3) In case of vcc = off level, please keep the level of input signals on the low or keep a high impedance.
- (4) T4 should be measured after the module has been fully discharged between power off and on period.
- (5) Interface signal shall not be kept at high impedance when the power is on.

Approval

# 7. OPTICAL CHARACTERISTICS

# 7.1 TEST CONDITIONS

Item	Symbol	Value	Unit			
Ambient Temperature	Та	25±2	°C			
Ambient Humidity	На	50±10	%RH

		$\theta_{x}$ -	OD> 40	80	85	-		
	Vertical	θ <sub>Y</sub> +	CR≥10	80	85	Ī		
		θ <sub>Y</sub> -		80	85	-		

DCC No.:24044113 Issued Date: Feb. 25, 2005

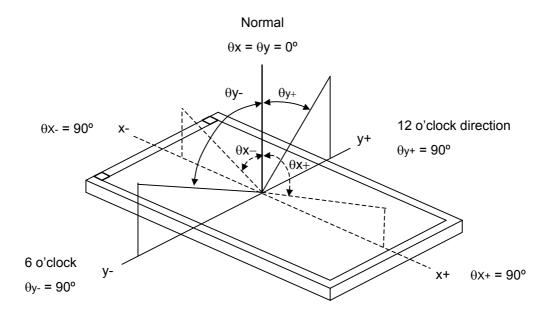

Model No.: V296W1

Note (1) Definition of Viewing Angle ( $\theta x$ ,  $\theta y$ ):

Viewing angles are measured by EZ-Contrast 160R (Eldim)

Note (2) Definition of Contrast Ratio (CR):

The contrast ratio can be calculated by the following expression.

Contrast Ratio (CR) = L255 / L0

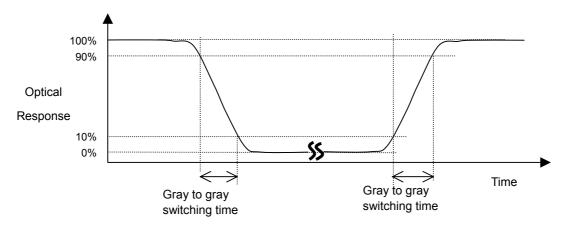

L255: Luminance of gray level 255

L 0: Luminance of gray level 0

CR = CR(5)

CR (X) is corresponding to the Contrast Ratio of the point X at the figure in Note (8).

# Note (3) Definition of Gray to Gray Switching Time:

The driving signal means the signal of gray level 0, 63, 127, 191, 255.

Gray to gray average time means the average switching time of gray level 0,63,127,191,255 to each other.

Approval

Note (4) Definition of Luminance of White (L<sub>C</sub>, L<sub>AVE</sub>):

Measure the luminance of gray level 255 at center point and 5 points

$$L_{C} = L (5)$$

$$L_{AVE} = [L(1) + L(2) + L(3) + L(4) + L(5)] / 5$$

L (x) is corresponding to the luminance of the point X at the figure in Note (8).

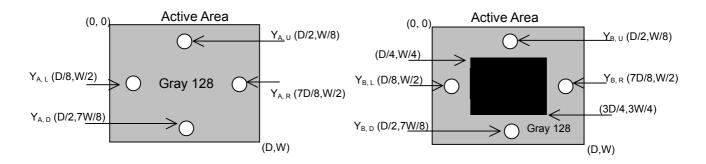

# Note (5) Definition of Cross Talk (CT):

$$CT = | Y_B - Y_A | / Y_A \times 100 (\%)$$

Where:

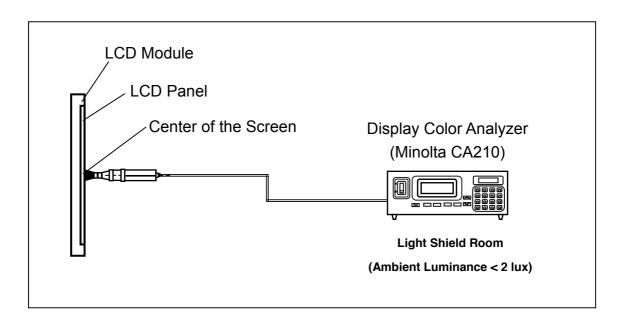

Y<sub>A</sub> = Luminance of measured location without gray level 0 pattern (cd/m<sup>2</sup>)

Y<sub>B</sub> = Luminance of measured location with gray level 0 pattern (cd/m<sup>2</sup>)

#### Note (6) Measurement Setup:

The LCD module should be stabilized at given temperature for 1 hour to avoid abrupt temperature change during measuring. In order to stabilize the luminance, the measurement should be executed after lighting Backlight for 1 hour in a windless room.

Model No.: V296W1 - L11

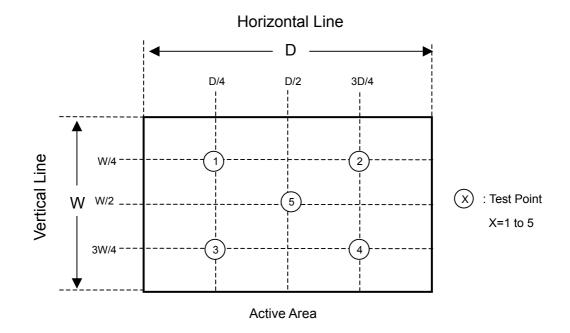

Approval

Note (7) Definition of White Variation ( $\delta W$ ):

Measure the luminance of gray level 255 at 5 points

 $\delta W = Maximum [L (1), L (2), L (3), L (4), L (5)] / Minimum [L (1), L (2), L (3), L (4), L (5)]$

# 9. DEFINITION OF LABELS

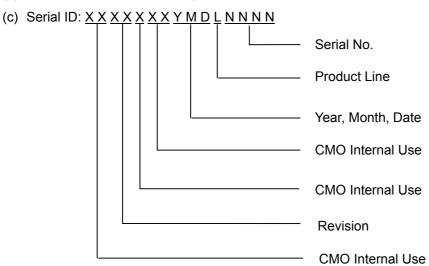

#### 9.1 CMO MODULE LABEL

The barcode nameplate is pasted on each module as illustration, and its definitions are as following explanation.

(a) Model Name: V296W1-L11

(b) Revision: Rev. XX, for example: A0, A1... B1, B2... or C1, C2...etc.

Serial ID includes the information as below:

(a) Manufactured Date: Year: 1~9, for 2001~2009

Month: 1~9, A~C, for Jan. ~ Dec.

Day: 1~9, A~Y, for 1<sup>st</sup> to 31<sup>st</sup>, exclude I,O, and U.

(b) Revision Code: Cover all the change

(c) Serial No.: Manufacturing sequence of product

(d) Product Line: 1 -> Line1, 2 -> Line 2, ...etc.

Approval

# 10. PRECAUTIONS

#### 10.1 ASSEMBLY AND HANDLING PRECAUTIONS

- (1) Do not apply rough force such as bending or twisting to the module during assembly.
- (2) It is recommended to assemble or to install a module into the user's system in clean working areas. The dust and oil may cause electrical short or worsen the polarizer.
- (3) Do not apply pressure or impulse to the module to prevent the damage of LCD panel and Backlight.
- (4) Always follow the correct power-on sequence when the LCD module is turned on. This can prevent the damage and latch-up of the CMOS LSI chips.
- (5) Do not plug in or pull out the I/F connector while the module is in operation.
- (6) Do not disassemble the module.
- (7) Use a soft dry cloth without chemicals for cleaning, because the surface of polarizer is very soft and easily scratched.
- (8) Moisture can easily penetrate into LCD module and may cause the damage during operation.
- (9) High temperature or humidity may deteriorate the performance of LCD module. Please store LCD modules in the specified storage conditions.
- (10) When ambient temperature is lower than 10°C, the display quality might be reduced. For example, the response time will become slow, and the starting voltage of CCFL will be higher than that of room temperature.

#### 10.2 SAFETY PRECAUTIONS

- (1) The startup voltage of a Backlight is approximately 1000 Volts. It may cause an electrical shock while assembling with the inverter. Do not disassemble the module or insert anything into the Backlight unit.
- (2) If the liquid crystal material leaks from the panel, it should be kept away from the eyes or mouth. In case of contact with hands, skin or clothes, it has to be washed away thoroughly with soap.
- (3) After the module's end of life, it is not harmful in case of normal operation and storage.
