## 1. Application

The display is a TFT active matrix electrophoretic display, with associated interface and control logic, and a reference system design.

The 6" active area contains 600 x 800 pixels, the display is capable to display images at 2-16 gray levels (1-4 bits) depending on the display controller and the associated waveform file used.

## 2. Features

- High contrast TFT electrophoretic
- 600 x 800 display
- High reflectance
- Ultra wide viewing angle
- Ultra low power consumption
- Pure reflective mode
- Bi-stable
- Commercial temperature range
- Landscape, portrait mode
- Antiglare hard-coated front-surface

Typical power panel	P <sub>TYP</sub>		-	547	-	mW
Operating temperature			0	-	50	°C
Storage temperature			-25	-	70	°C

- The Typical power consumption is measured with following pattern transition: from horizontal 4 gray scale pattern to vertical 4 gray scale pattern. (Note 6-1)
- The standby power is the consumed power when the panel controller is in standby mode.
- The listed electrical/optical characteristics are only guaranteed under the controller & waveform provided by EIH
- Vcom is recommended to be set in the range of assigned value  $\pm 0.1V$
- The maximum  $I_{COM}$  inrush current is about 800 mA

## 7. Power on Sequence

Power Rails must be sequenced in the following order :

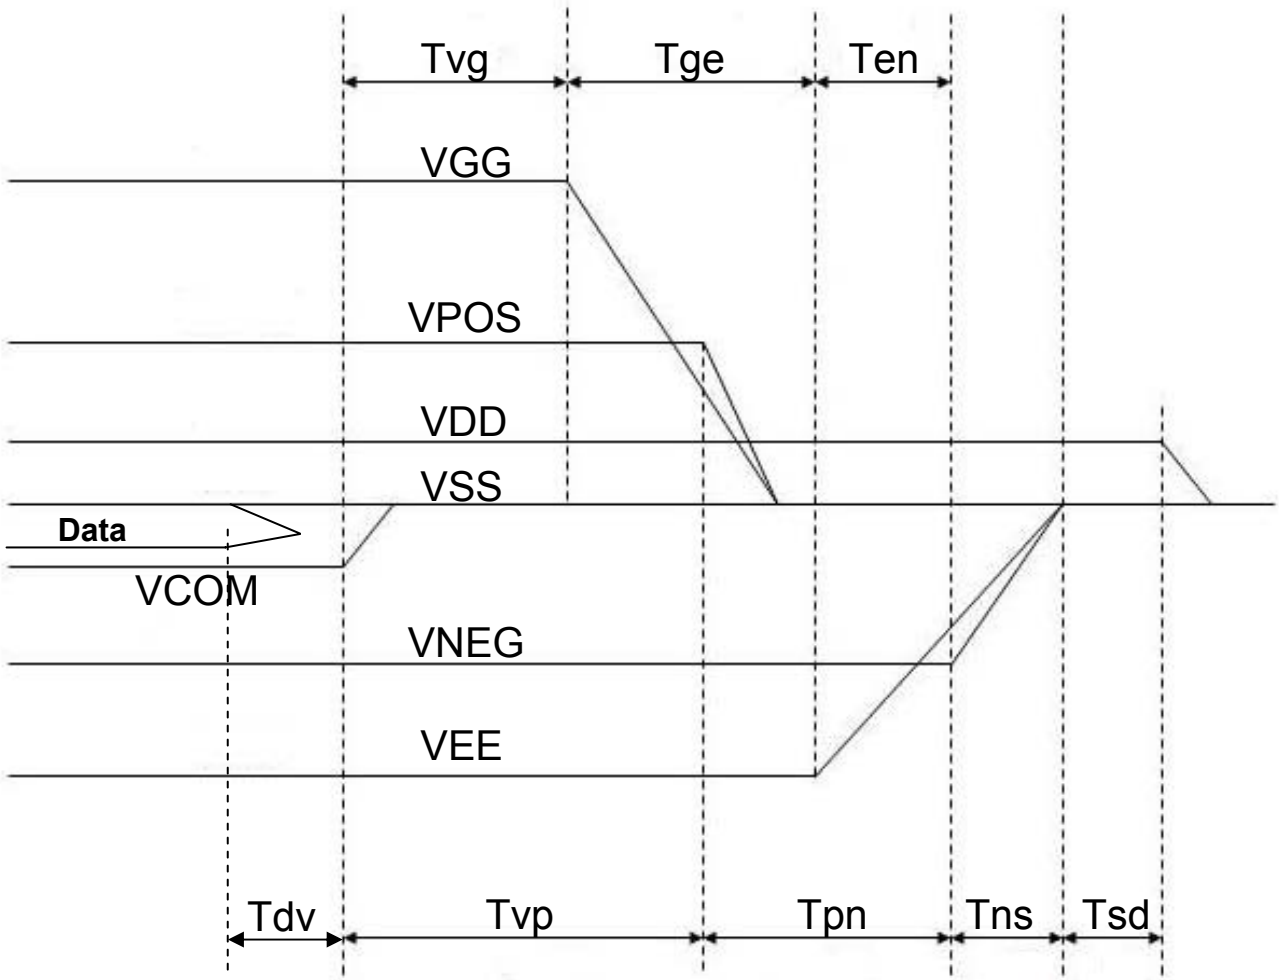

1. VSS → VDD → VNEG → VPOS (Source driver) → VCOM
2. VSS → VDD → VEE → VGG (Gate driver)

8. Discharge time Sequence

Note8-1 : Supply voltages decay through pulldown resistors.

Note8-2 : VEE must remain negative of all other supplies during decay period.

8-1) Refresh Rate

The module ED60SC7 is applied at a maximum screen refresh rate of 85Hz.

	Min	Max
Refresh Rate	-	85Hz

## 9. Optical characteristics

### 9-1) Specifications

Measurements are made with that the illumination is under an angle of 30 degrees, the detection is perpendicular unless otherwise specified.

T = 25°C

m:4 、 8 、 16 when 2 、 3 、 4 bits mode

Note 9-1: Luminance meter: Eye – One Pro Spectrophotometer

### 9-2) Definition of contrast ratio

The contrast ratio (CR) is the ratio between the reflectance in a full white area (Rl) and the reflectance in a dark area (Rd):

$$CR = Rl/Rd$$

**9-3) Reflection Ratio**

The reflection ratio is expressed as:

$$R = \text{Reflectance Factor}_{\text{white board}} \times (L_{\text{center}} / L_{\text{white board}})$$

$L_{\text{center}}$  is the luminance measured at center in a white area ( $R=G=B=1$ ).  $L_{\text{white board}}$  is the luminance of a standard white board. Both are measured with equivalent illumination source. The viewing angle shall be no more than 2 degrees.

$\alpha = \text{declination}$  /  $\theta = \text{azimuth}$

**10.HANDLING, SAFETY AND ENVIROMENTAL REQUIREMENTS****WARNING**

The display glass may break when it is dropped or bumped on a hard surface. Handle with care. Should the display break, do not touch the electrophoretic material. In case of contact with electrophoretic material, wash with water and soap.

**CAUTION**

The display module should not be exposed to harmful gases, such as acid and alkali gases, which corrode electronics components.

Disassembling the display module can cause permanent damage and invalidates the warranty agreements.

Observe general precautions that are common to handling delicate electronic components. The glass can break and front surfaces can easily be damaged. Moreover the display is sensitive to static electricity and other rough environmental conditions.

**Data sheet status**

Product specification	This data sheet contains final product specifications.
-----------------------	--

**Limiting values**

Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

**Application information**

Where application information is given, it is advisory and does not form part of the specification.

**11. Reliability test**
