### **1. Application**

This data sheet applies to a color TFT LCD module, PM058OX1. The module applies to OA product, GPS, which require high quality flat panel display. If you must use in high reliability environment, the module can't over reliability test condition. If you use PM058OX1, E Ink Holding Inc. advises your system sides must use NT71355 which one generates signal to control PM058OX1.

### 2. Features

- . Amorphous silicon TFT LCD panel
- . Pixel in stripe configuration
- . Display Colors : 262,144 colors
- . Optimum Viewing Direction : 6 o'clock

### 3. Mechanical Specifications

Parameter	Specifications	Unit
Screen Size	5.8(diagonal)	inch
Display Format	1280×(R, G, B)×768	dot
Display Colors	262,144	
Active Area	126.720(H)×74.880(V)	mm
Pixel Pitch	0.0990(H)×0.0975(V)	mm
Pixel Configuration	Stripe	
Outline Dimension	137.488(W)×84.700 (H)×1.630 (typ.) (D)	mm
Weight	TBD	g
Surface treatment	Normal	
Display mode	Normally White	
Gray scale inversion direction	6 o'clock [ref to Note13-1]

The information contained herein is the exclusive property of E Ink Holdings Inc. and shall not be distributed,

Note 5-1 :  $V_{GG} = 18.0V$ 

#### Note 5-2 : $V_{EE}$ = -6V

Note 5-3 : Select left or right shift

R/L	DIO1	DIO2	Shift
1	Input	Hi-Z	Left to right
0	Hi-Z	Input	Right to left

Note 5-4 : Gate driver shift clock

Note 5-5 : When OE is connected to high "1", the driver outputs are disabled (Gate output =  $V_{EE}$ ). Under this condition, the operation of registers will not be affected.

Note 5-6 : Select up or down shift

U/D	STVU	STVD	Shift
1	Hi-Z	Input	Down to Up
0	Input	Hi-Z	Up to Down

- Note 5-7 : Latch the polarity of outputs and switch the new data to outputs At the rising edge (LD), latch the "POL" signal to control the polarity of the outputs.
- Note 5-8 : Control whether the Data D00~D25 are inverted or not. When "REV=1", these data will be inverted. EX: "00"→"3F", "07"→"38", "15"→"2A"
- Note 5-9 : Polarity selector for dot-inversion control. Available at the rising edge of LD. When POL=1 : Even outputs range from V1~V7, and Odd outputs range from V8~V14. When POL=0 : Even outputs range from V8~V14, and Odd outputs range from V1~V7.

The information contained herein is the exclusive property of E Ink Holdings Inc. and shall not be distributed,

Note 5-10: Typical Application Circuit(When VDD2=12.5V)

## **13. Optical Characteristics**

#### 13-1) Specification :

The backlight which EIH used is LED for optical measuring and the specification of average brightness is  $10930(cd/m^2)$ .

								<b>Ta=25</b> ℃	
Param	eter	Symbol	Condition	MIN.	TYP.	MAX.	Unit	Remarks	
	Horizontal	$\theta$ 21, $\theta$ 22		45	50	-	deg		
Viewing Angle	Vortical	$\theta$ 12(to 12 o'clock)	$CR \ge 10$	10	15	-	deg	Note 13-1	
	Vertical	$\theta$ 11(to 6 o'clock)		30	35	-	deg		
Contrast	Ratio	CR	At optimized Viewing angle	TBD	TBD	-	-	Note 13-3	
Persona time	Rise	Tr	$Q = 0^{\circ}$	-	15	30	ms	Note 13-2	
Response tille	Fall	Tf	0-0	-	25	50	ms		
Transmiss	ion ratio	Т	$\theta = 0^{\circ}$	TBD	TBD	-	-	-	
Cross	talk		$\theta = 0^{\circ}$	-	-	3.5	%	Note 13-4	

All the optical measurement shall be executed 30 minute after backlight being turn-on. The optical characteristics shall be measured in dark room (ambient illumination on panel surface less than 1 Lux). The measuring configuration shows as following figure.

Optical characteristics measuring configuration

## 14. Handling Cautions

### 14-1) Mounting of module

- a) Please power off the module when you connect the input/output connector.
- b) Polarizer which is made of soft material and susceptible to flaw must be handled carefully.
- c) Protective film (Laminator) is applied on surface to protect it against scratches and dirt.
- d) Please following the tear off direction as figure 14-1 to remove the protective film as slowly as possible, so that electrostatic charge can be minimized.
- e) After combining the plastic frame with the top chassis, user must reserve enough space to FPC to avoid FPC damage due to lack of space Figure 14-2.
- 14-2) Precautions in mounting
- a) When metal part of the TFT-LCD module (shielding lid and rear case) is soiled, wipe it with soft dry cloth.
- b) Wipe off water drops or finger grease immediately. Long contact with water may cause discoloration or spots.
- c) TFT-LCD module uses glass which breaks or cracks easily if dropped or bumped on hard surface. Please handle with care.
- d) Since CMOS LSI is used in the module. So take care of static electricity and earth yourself when handling.

14-3) Adjusting module

- a) Adjusting volumes on the rear face of the module have been set optimally before shipment.
- b) Therefore, do not change any adjusted values. If adjusted values are changed, the specifications described may not be satisfied.

14-4) Others

- a) Do not expose the module to direct sunlight or intensive ultraviolet rays for many hours.
- b) Store the module at a room temperature place.
- c) The voltage of beginning electric discharge may over the normal voltage because of leakage current from approach conductor by to draw lump read lead line around.
- d) If LCD panel breaks, it is possibly that the liquid crystal escapes from the panel. Avoid putting it into eyes or mouth. When liquid crystal sticks on hands, clothes or feet. Wash it out immediately with soap.
- e) Observe all other precautionary requirements in handling general electronic components.
- f) Please adjust the voltage of common electrode as material of attachment by 1 module.
- 14-5) Polarizer mark

The polarizer mark is to describe the direction of wide view angle film how to mach up with the rubbing direction.

## 15. Reliability Test

No	Test Item	Test Condition	Remark
1	High Temperature Storage Test	$Ta = +80^{\circ}C$ , 240 hrs	
2	Low Temperature Storage Test	$Ta = -30^{\circ}C$ , 240 hrs	
3	High Temperature Operation Test	$Ta = +70^{\circ}C$ , 240 hrs	
4	Low Temperature Operation Test	$Ta = -20^{\circ}C$ , 240 hrs	
5	High Temperature & High Humidity	$Ta = +60^{\circ}C$ , 90%RH, 240 hrs	
	Operation Test	(No Condensation)	
(	Thermal Cycling Test	-20°C →+70°C, 200 Cycles	
6	(non-operating)	(30min – 30min)	
7	Electrostatic Discharge Test (non-operating)	200pF, 0Ω ±200V	
	(	1 time / each terminal	

Ta : ambient temperature

Note: The protective film must be removed before temperature test.

[Criteria]

In the standard conditions, there is not display function NG issue occurred. (including : line defect ,no image). All the cosmetic specification is judged before the reliability stress.
