Document Title	HSD150SX89 Product Information	Page No.	18 / 34
Document No.		Revision	0.2

Note: (1) Lamp current is measured with current meter for high frequency as shown below.
Specified values are for a lamp.

- (2) Lamp frequency may produce interference with horizontal synchronous frequency and this may cause line flow on the display. Therefore lamp frequency shall be detached from the horizontal synchronous frequency and its harmonics as far as possible in order to avoid interference.
- (3) Life time (Hr) can be defined as the time in which it continues to operate under the condition: Temp. = $25 \pm 3^\circ\text{C}$, $I_L = 6.5\text{mA(rms.)}$ and $f_L = 50\text{ KHz}$ until one of the following event occurs:
1. When the brightness becomes 50%.
 2. When the startup voltage (V_s) at 0°C becomes higher than the maximal value of V_s specified above.

Note 3) Do not fix CPH1 and CPH2 to “H” or “L” level while the V_{DD} (+3.3V) is supplied. If CPH1 and CPH2 is fixed to “H” level or “L” level for certain period while the V_{DD} (+3.3V) is supplied, the panel may be damaged.

Note 4) Do not change t3 and 6 values in the operation. When t1 or t4 is changed, the panel is displayed as black.

6.4 Power On / Off Sequence :

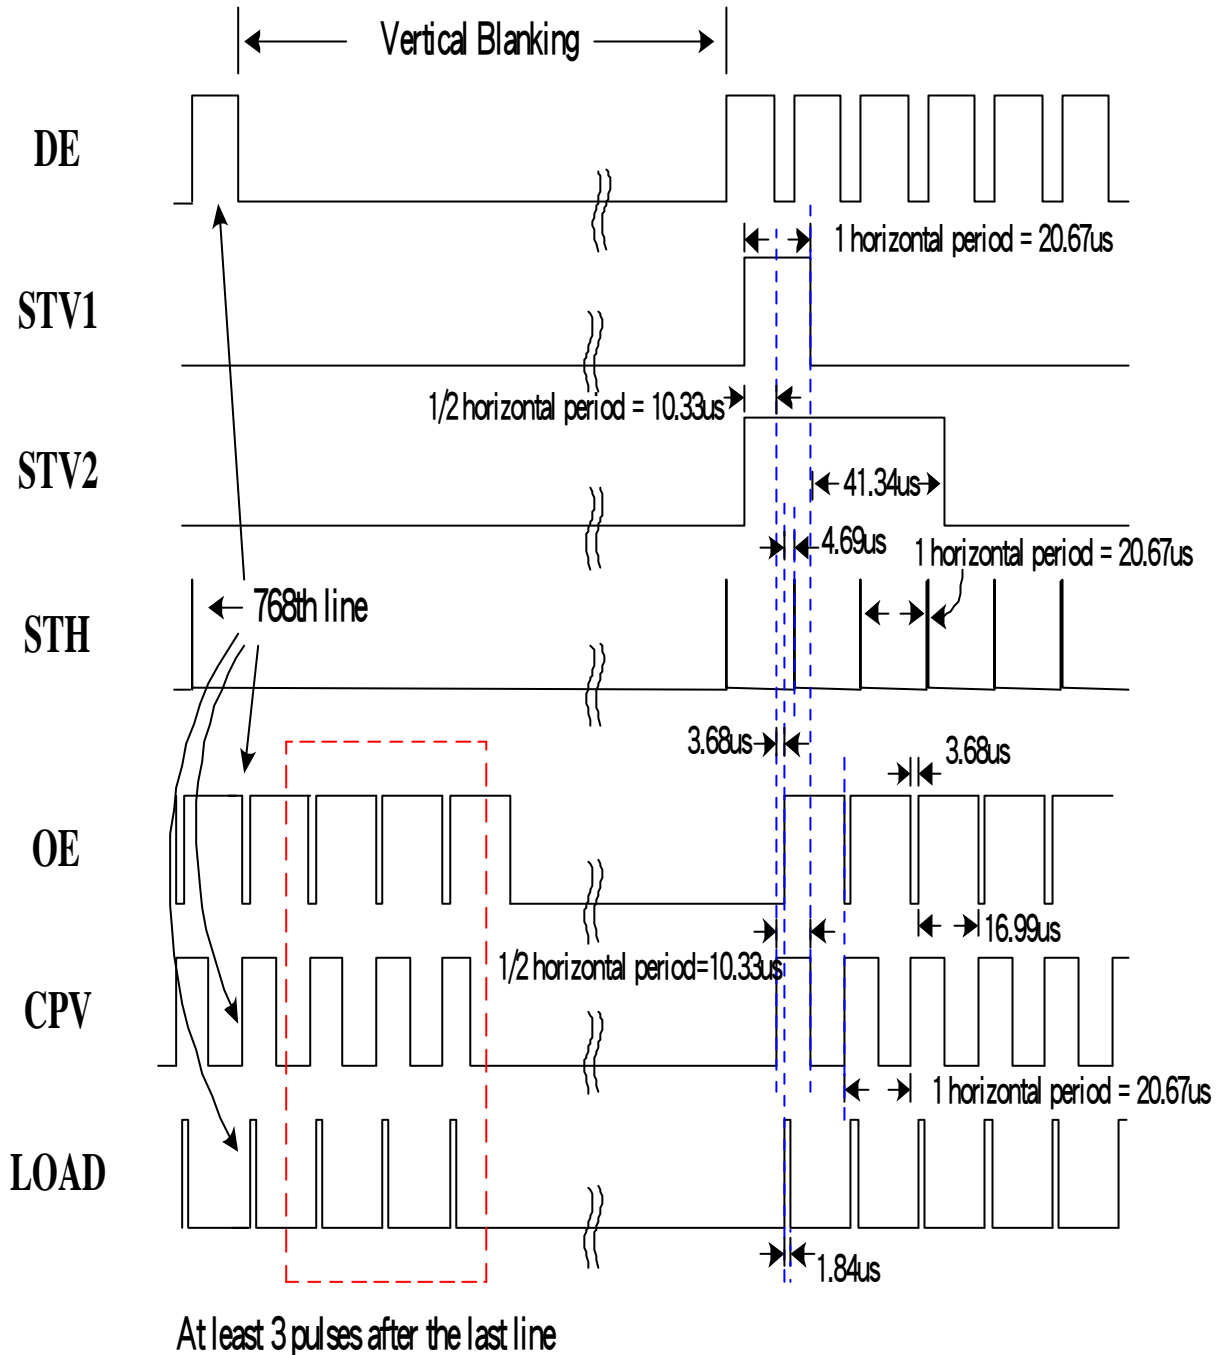

Item	Min.	Typ.	Max.	Unit	Remark
TP1	0.4	—	10	msec	
TP2	100	—	200	msec

TP4	1	—	—	sec	
TP5	200	—	—	msec	
TP6	200	—	—	msec	

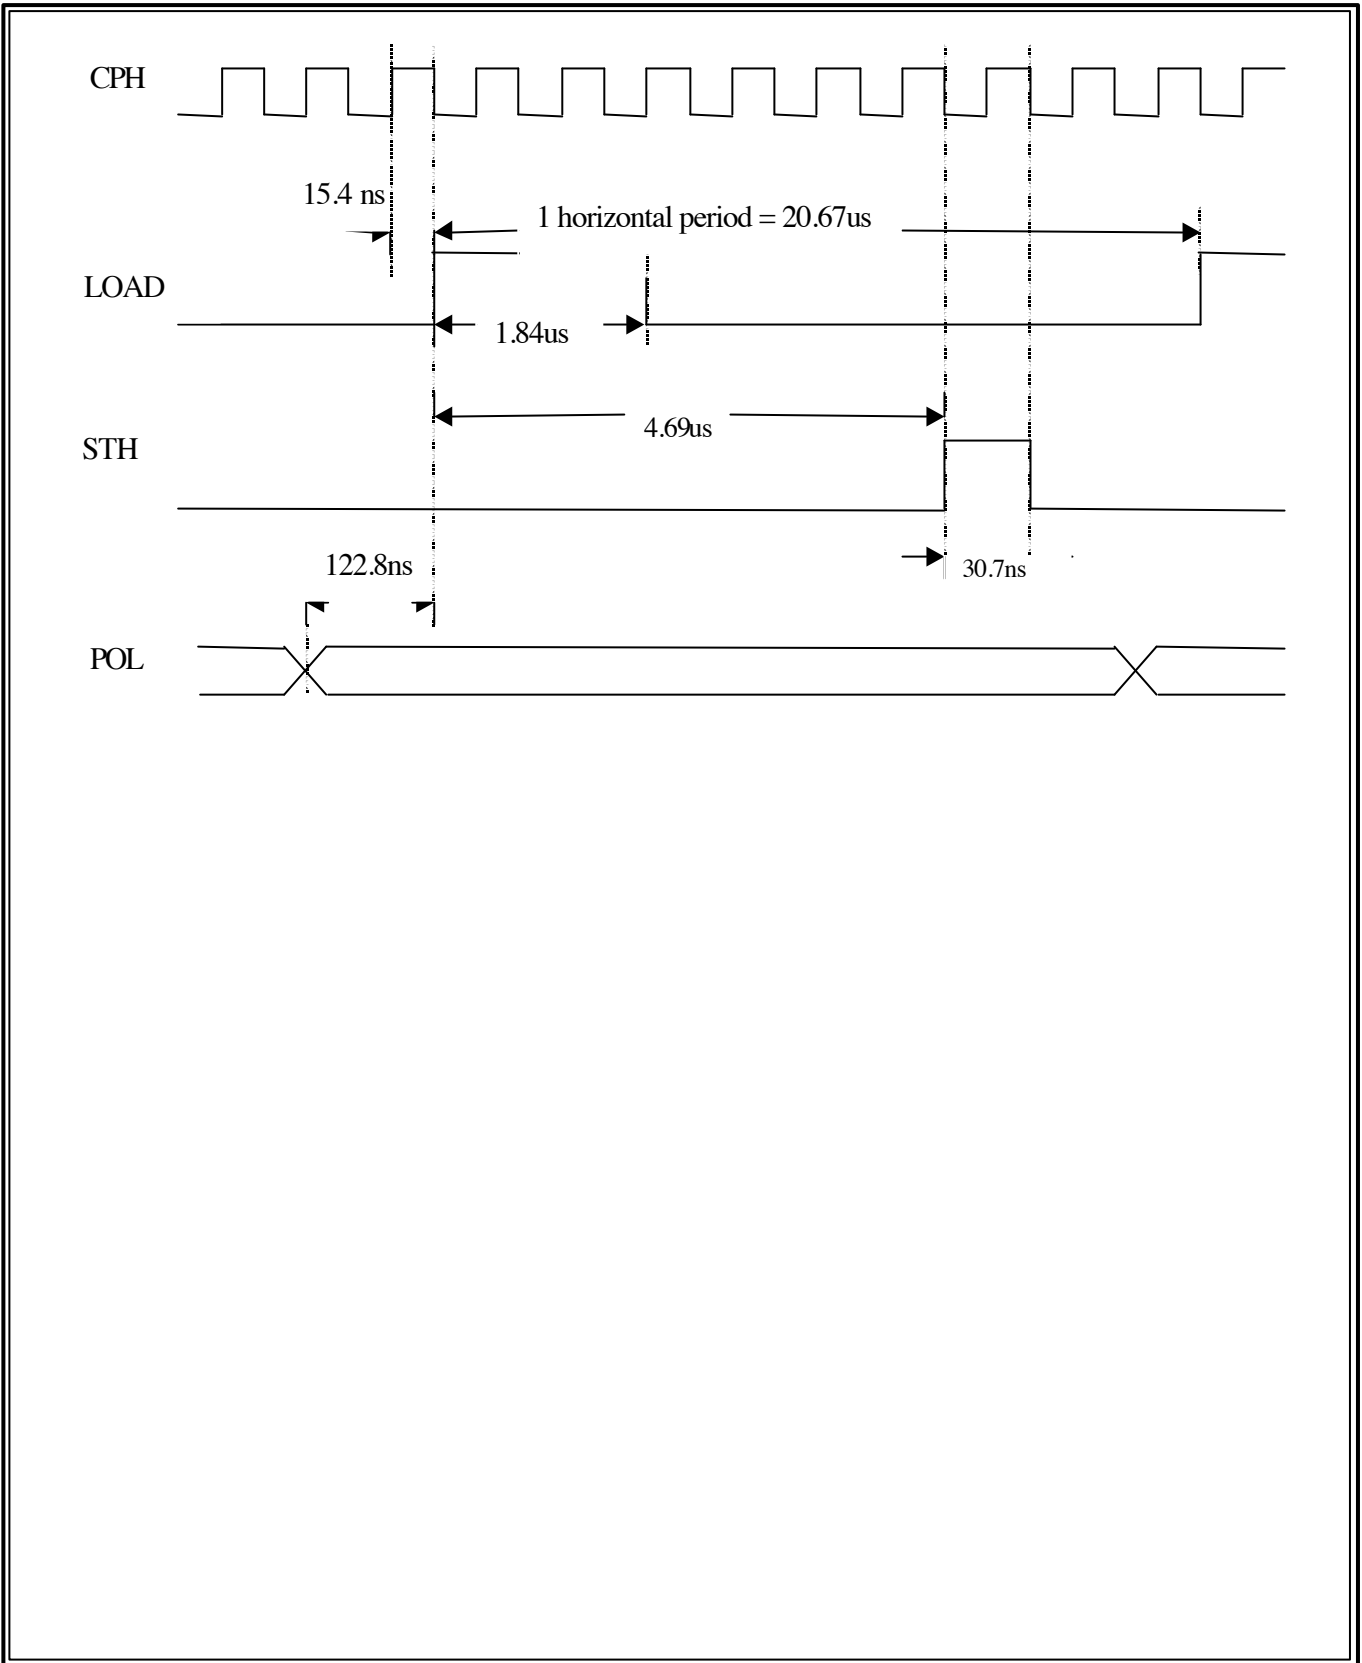

- Note :
- (1) The supply voltage of the external system for the module input should be the same as the definition of V_{DD}.
 - (2) Apply the lamp voltage within the LCD operation range. When the back-light turns on before the LCD operation or the LCD turns off before the back-light turns off, the display may momentarily become white.
 - (3) In case of V_{DD} = off level, please keep the level of input signal on the low or keep a high impedance.
 - (4) T4 should be measured after the module has been fully discharged between power off and on period.
 - (5) Interface signal shall not be kept at high impedance when the power is on.

11.0 GENERAL PRECAUTION

11.1 Use Restriction

This product is not authorized for use in life supporting systems, aircraft navigation control systems, military systems and any other application where performance failure could be life-threatening or otherwise catastrophic.

11.2 Disassembling or Modification

Do not disassemble or modify the module. It may damage sensitive parts inside LCD module, and may cause scratches or dust on the display. HannStar does not warrant the module, if customers disassemble or modify the module.

11.3 Breakage of LCD Panel

- 10.3.1 If LCD panel is broken and liquid crystal spills out, do not ingest or inhale liquid crystal, and do not contact liquid crystal with skin.
- 10.3.2 If liquid crystal contacts mouth or eyes, rinse out with water immediately.
- 10.3.3 If liquid crystal contacts skin or cloths, wash it off immediately with alcohol and rinse thoroughly with water.
- 10.3.4 Handle carefully with chips of glass that may cause injury, when the glass is broken.

11.4 Electric Shock

- 11.2.1 Disconnect power supply before handling LCD module.
- 11.2.2 Do not pull or fold the CCFL cable.
- 11.2.3 Do not touch the parts inside LCD modules and the fluorescent lamp's connector or cables in order to prevent electric shock.

11.5 Absolute Maximum Ratings and Power Protection Circuit

- 11.5.1 Do not exceed the absolute maximum rating values, such as the supply voltage variation, input voltage variation, variation in parts' parameters, environmental temperature, etc., otherwise LCD module may be damaged.
- 11.5.2 Please do not leave LCD module in the environment of high humidity and high temperature for a long time.
- 11.5.3 It's recommended employing protection circuit for power supply.

11.6 Operation

- 11.6.1 Do not touch, push or rub the polarizer with anything harder than HB pencil lead.
- 11.6.2 Use fingerstalls of soft gloves in order to keep clean display quality, when persons handle the LCD module for incoming inspection or assembly.
- 11.6.3 When the surface is dusty, please wipe gently with absorbent cotton or other soft material.
- 11.6.4 Wipe off saliva or water drops as soon as possible. If saliva or water drops contact with polarizer for a long time, they may causes deformation or color fading.
- 11.6.5 When cleaning the adhesives, please use absorbent cotton wetted with a little petroleum benzine or other adequate solvent.

11.7 Mechanism

Please mount LCD module by using mounting holes arranged in four corners tightly.

11.8 Static Electricity

11.8.1 Protection film must remove very slowly from the surface of LCD module to prevent from electrostatic occurrence.

11.8.2 Because LCD module uses CMOS-IC on circuit board and TFT-LCD panel, it is very weak to electrostatic discharge. Please be careful with electrostatic discharge.

11.8.3 Persons who handle the module should be grounded through adequate methods.

11.9 Strong Light Exposure

The module shall not be exposed under strong light such as direct sunlight. Otherwise, display characteristics may be changed.

11.10 Disposal

When disposing LCD module, obey the local environmental regulations.
