1. General Descriptions

The LG Electronics model LM151X2 LCD is a Color Active Matrix Liquid Crystal Display with an integral Cold Cathode Fluorescent Tube(CCFT) back light system. The matrix employs a-Si Thin Film Transistor as the active element. It is a transmissive type display operating in the normally white mode. This TFT-LCD has a 15.1 inch diagonally measured active display area with XGA resolution(768 vertical by 1024 horizontal pixel array). Each pixel is divided into Red, Green and Blue sub-pixels or dots which are arranged in vertical stripes. Gray scale or the brightness of the sub-pixel color is determined with a 6-bit gray scale signal for each dot, thus, presenting a palette of more than 262,144 colors.

LM151X2 has been designed to apply the CMOS logic level interface.

The LM151X2 LCD is intended to support applications where high brightness, wide viewing angle, high color saturation, and high color depth are very important. In combination with the vertical arrangement of the sub-pixels, the LM151X2 characteristics provide an excellent flat panel display for office automation products such as monitors.

4. Optical Specifications

Optical characteristics are determined after the unit has been 'ON' and stable for approximately 30 minutes in a dark environment at 25°C. The values specified are at an approximate distance 50cm from the LCD surface at a viewing angle of Φ and θ equal to 0° and aperture 1 degree. The test equipment is PhotoResearch Prichard SpectroRadiometer Model 1980B-SC or equivalent. The input signal voltage and timing specification are V_{DD} of 3.3V and VESA XGA @60Hz respectively. The input current of backlight is 8mA($F_{BL} = 50\text{KHz}$) at the ground terminals.

$$\frac{\text{Surface Brightness with all white pixels}}{\text{Surface Brightness with all black pixels}}$$

Contrast ratio shall be measured at the center of the display (Location 1).

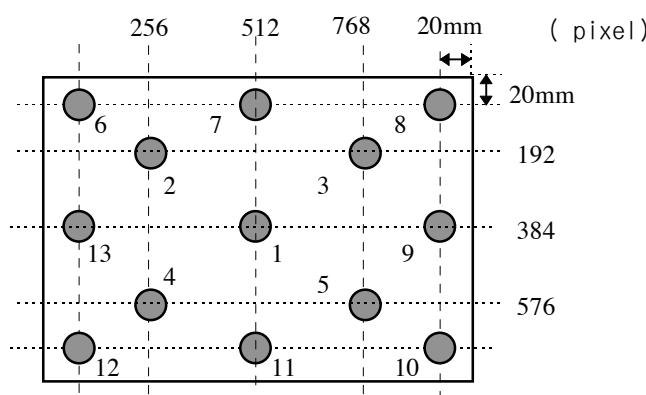

2. Average Brightness is the average of brightness value at location 1 to 5 with all pixels displaying white.

$$B(\text{AVE}) = \frac{B_1 + B_2 + B_3 + B_4 + B_5}{5}$$

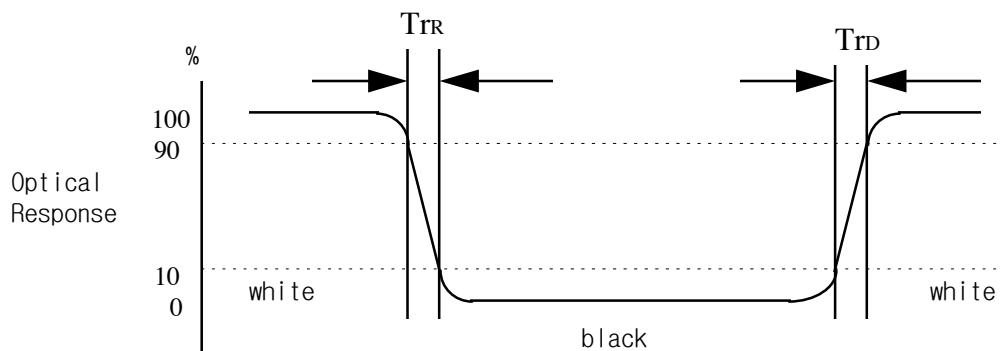

3. The variation in surface brightness, SB_V is defined as :

$$\frac{\text{Maximum } (B_1, B_2, \dots, B_{13}) - \text{Minimum } (B_1, B_2, \dots, B_{13})}{\text{Average } (B_1, B_2, \dots, B_5)} \times 100(\%)$$

Where B₁ to B₁₃ are the brightness with all pixels displaying white at 13 locations.

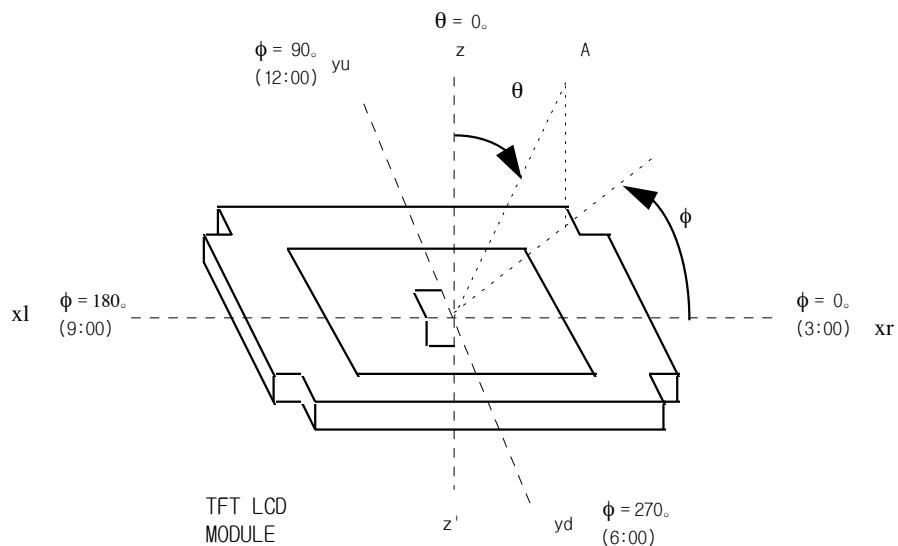

4. The response time is defined as the following figure and shall be measured by switching the input signal for "black" and "white".

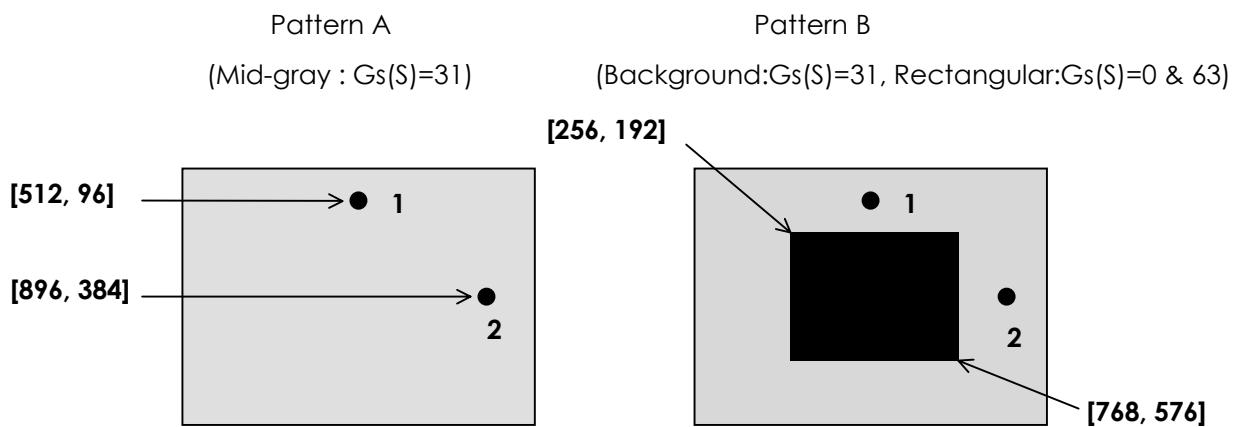

Product Specification (final)

5. Viewing angle is the angle at which the contrast ratio is greater than 10.

14. PRECAUTIONS

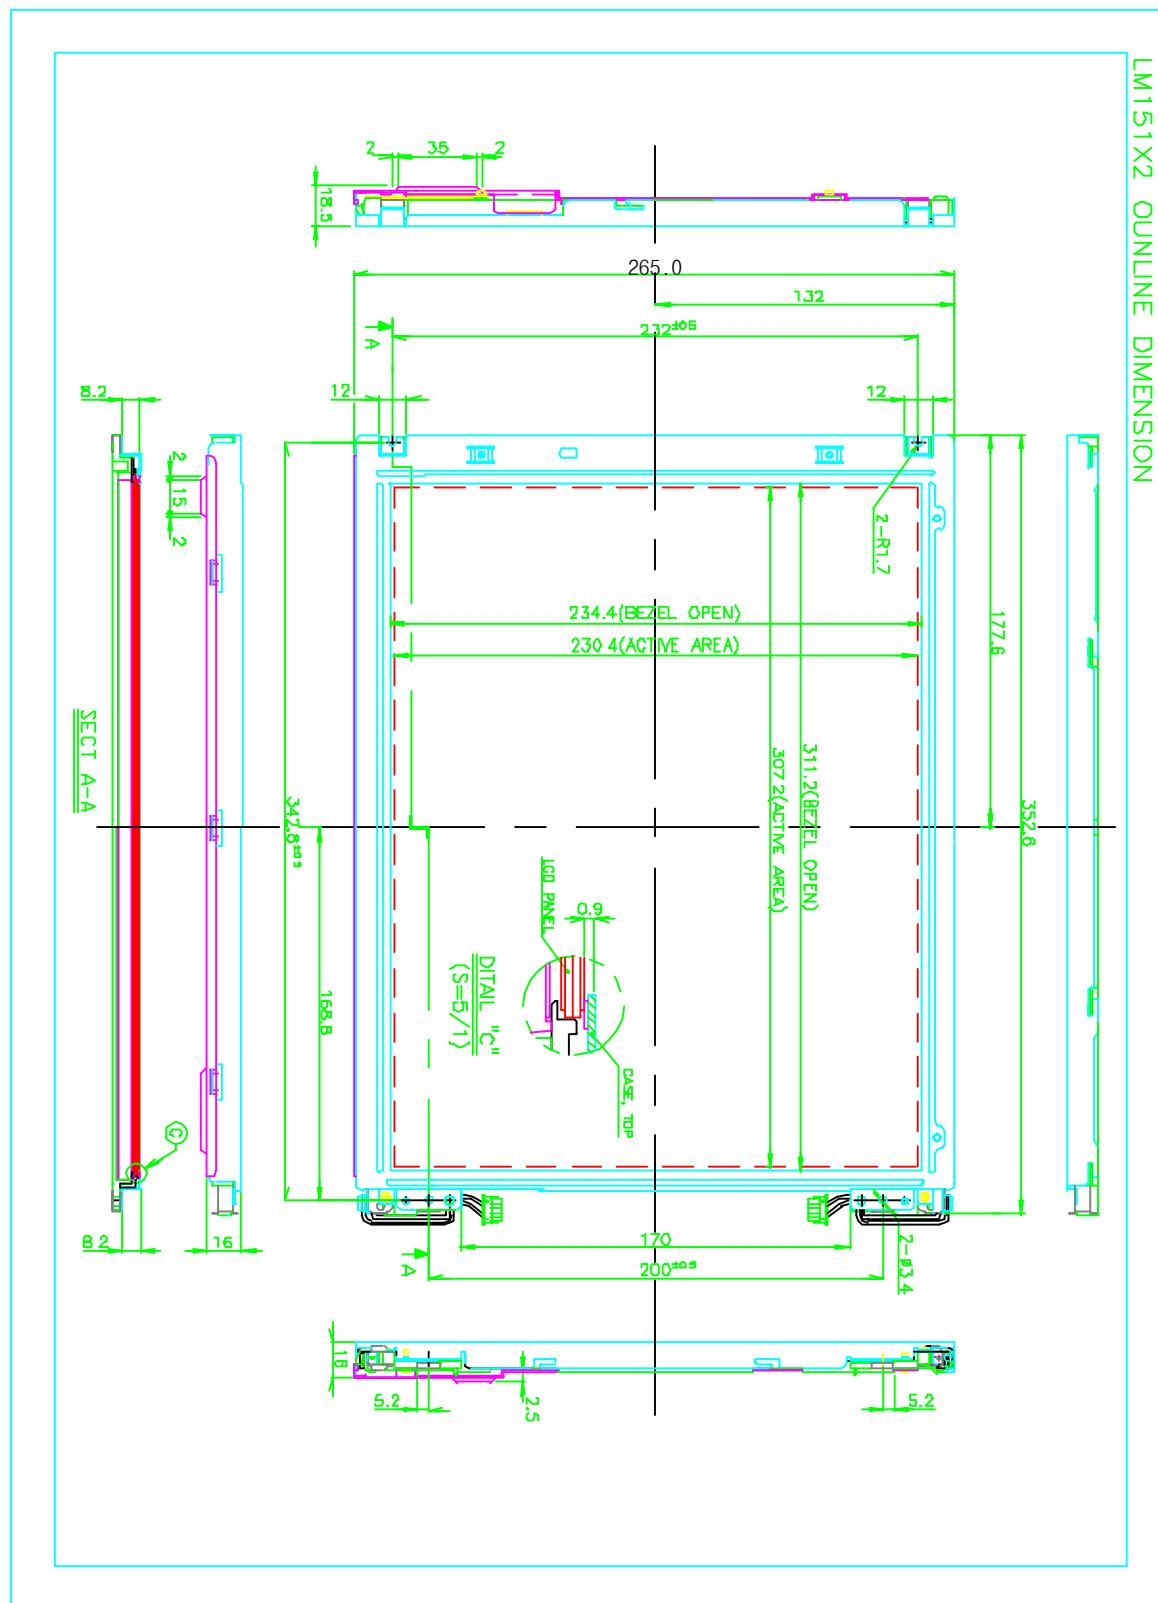

Please pay attention to the followings when you use this TFT-LCD module with Back-light unit.

- 1) You must mount Module using mounting holes arranged in 4 corners.
- 2) Be sure to turn off the power when connecting or disconnecting the circuit.
- 3) Note that the polarizers are easily damaged. Pay attention not to scratch or press this surface with any hard object.
- 4) When the LCD surface become dirty, please wipe it off with a soft material. (ie. cotton ball)
- 5) Protect the module from the ESD as it may damage the electronic circuit (C-MOS).
Make certain that treatment person's body are grounded through wrist bend.
- 6) Do not disassemble the module and be careful not to incur a mechanical shock that might occur during installation. It may cause permanent damage.
- 7) Do not leave the module in high temperatures, particularly in areas of high humidity for a long time.
- 8) The module not be expose to the direct sunlight.
- 9) Avoid contact with water as it may a short circuit within the module.
- 10) Do not apply invalid signal, especially very high frequency data clock and H_{Sync}. Invalid signal causes improper shutdown of DC/DC converter in LCM or permanent damage to LCD module.
(If DC/DC converter in LCM is in shutdown state, LCM shows only white screen. Then please turn off and on once LCM power.)
- 11) If the LCM displays the same pattern continuously for a long period of time, it can be the image sticking to the screen.
