1. Application

This technical specification applies to 5" color TFT-LCD module, PA050XU4. The applications of the panel are car TV, portable DVD, GPS, multimedia applications and others AV system..

2. Features

- . Compatible with NTSC & PAL system
- . Pixel in stripe configuration
- . Slim and compact
- . Image Reversal: Up/Down and Left/Right

(Testing configuration see 10-2)

Contrast Ratio is measured in optimum common electrode voltage.

Note 10-3 : Topcon BM-7(fast) luminance meter 1° field of view is used in the testing (after 20~30 minutes operation).

Lamp Current 6mA

Note 10-4: The definition of response time:

Note 10-5: The uniformity of LCD is defined as

U = The Minimum Brightness of the 9 testing Points

The Maximum Brightness of the 9 testing Points

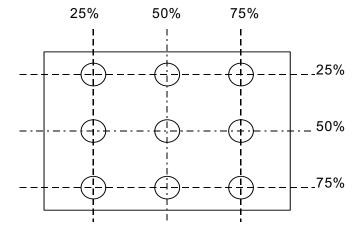

Luminance meter: BM-5A or BM-7 fast(TOPCON)

Measurement distance: 500 mm +/- 50 mm

Ambient illumination : < 1 Lux

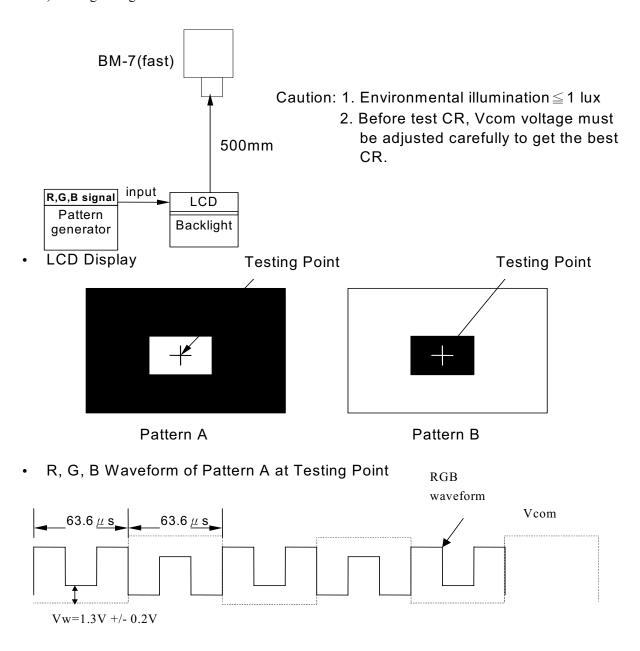

Measuring direction: Perpendicular to the surface of module

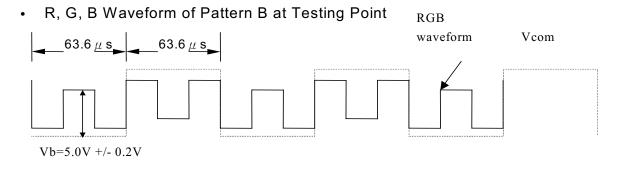

The test pattern is white (Gray Level 63).

10-2) Testing configuration

11. Handling Cautions

- 11-1) Mounting of module
 - a) Please power off the module when you connect the input/output connector.
 - b) Please connect the ground pattern of the inverter circuit surely. If the connection is not perfect, some following problems may happen possibly.
 - 1. The noise from the backlight unit will increase.
 - 2. The output from inverter circuit will be unstable.
 - 3. In some cases a part of module will heat.
 - c)Polarizer which is made of soft material and susceptible to flaw must be handled carefully.
 - d)Protective film (Laminator) is applied on surface to protect it against scratches and dirt.
 - e)Please following the tear off direction as figure 11-1 to remove the protective film as slowly as possible, so that electrostatic charge can be minimized.

11-2) Precautions in mounting

- a) When metal part of the TFT-LCD module (shielding lid and rear case) is soiled, wipe it with soft dry cloth.
- b) Wipe off water drops or finger grease immediately. Long contact with water may cause discoloration or spots.
- TFT-LCD module uses glass which breaks or cracks easily if dropped or bumped on hard surface.
 Please handle with care.
- d) Since CMOS LSI is used in the module. So take care of static electricity and earth yourself when handling.

11-3) Adjusting module

- a) Adjusting volumes on the rear face of the module have been set optimally before shipment.
- b) Therefore, do not change any adjusted values. If adjusted values are changed, the specifications described may not be satisfied.

11-4) Others

- a) Do not expose the module to direct sunlight or intensive ultraviolet rays for many hours.
- b) Store the module at a room temperature place.
- c) The voltage of beginning electric discharge may over the normal voltage because of leakage current from approach conductor by to draw lump read lead line around.
- d) If LCD panel breaks, it is possibly that the liquid crystal escapes from the panel. Avoid putting it into eyes or mouth. When liquid crystal sticks on hands, clothes or feet. Wash it out immediately with soap.
- e) Observe all other precautionary requirements in handling general electronic components.
- f) Please adjust the voltage of common electrode as material of attachment by 1 module.
