1. Scope

This Specification defines general provisions as well as inspection standards for AMOLED module supplied by SAMSUNG SMD Co., LTD., If the event of unforeseen problems or unspecified items occurs, we naturally shall negotiate and agree to solution with customer.

2. Warranty

Basically, warranty term is **15 months** of reliability characteristics of quality level after the outgoing date in SAMSUNG SMD Co., LTD., and SAMSUNG SMD Co., LTD., could compensate for defectives which happens within warranty term under condition that the products should be stored or be used as specified under normal condition within the contents of specification. Otherwise, it is impossible to compensate for defectives when they happens by customer's mistake such as careless handing or circuit change, etc.

And after 15 months of warranty term, all replacements for defectives will be charged.

This Specification stipulates the final and comprehensive requirements for the respective products hereof. Beyond this Specification, it is responsibility of the customer to explicitly disclose any additional requirements, information or reservations regarding these requirements to Samsung SMD prior to implementation, where any and all disclosures of the customer shall be with an authorized representative of Samsung SMD in writing. Samsung SMD shall not be responsible for safety, performance, functionality, compatibility of the system with which the Samsung SMD-supplied components are integrated unless such features have been expressly communicated and described in the Specification.

SAMSUNG SMD MAKES NO GUARANTY OR WARRANTY, EXPRESS OR IMPLIED INCLUDING BUT NOT LIMITED TO MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, TO ANY PARTY.

Moreover, any party should do their own due diligence regarding these requirements prior to implementation.

3. Features

- 1) Display Color : 16M_Color (RGB)
- 2) Display Format : 3.7" Visual WVGA 480 x 800 (240 RGBG x 800)
- 3) Interface : RGB-24bits, SPI-3 line
- 4) Driver IC : TL2796 By TOMATO LSI
- 5) Polarizer : Hard Coating Polarizer (2H)

4. Mechanical Specification

Item	Specifications	Unit
Outline dimension (Glass thickness)	53.94(W) x 90(H) x 1.5(T) (0.3t)	mm
Number of dots	240(W) x R(B)GB(R)G x 800(H)	Dots
Active area	48.24(W) x 80.4(H)	mm
Diagonal Inch	3.69	inch
Pixel pitch(RG or BG)	0.1005(W) x 0.1005(H)	mm

5. Maximum Rating

Item	Symbol	Min.	Max.	Unit	Note
Supply voltage	VCI	-0.3	3.6	V	(1),(2)
	IOVCC	-0.3	3.6	V	(1),(2)
	VBAT	0.3	6.0	V	(1),(2)

Humidity	Hop	10	95	%(RH)	-
Storage temperature	Tstg	-30	85	°C	-
Humidity	Hstg	10	95	%(RH)	

Note 1) VCI, IOVCC, VBAT should satisfy the below condition of
 VBAT > VCI, IOVCC > VSS (GND).

Note 2) If the supplied voltage exceeds the maximum limitation, LSI can be damaged permanently.
 Therefore, while operating, it is recommend to use LSI within the maximum electrical
 limitation. If not, LSI can cause decreased reliability or operational problems.

Note 3) Wet Bulb Temperature should not exceed 29 at most and not have any dew condensation.

6. Electrical Characteristics

- Test Conditions : IOVCC=2.8V, VCI=2.8V, Vbat=3.8V, VSS=0V, Tamb=25°C unless otherwise specified.

Note1) Uniformity Measuring Point

Note 2) Definition of contrast ratio (K)

$$\text{Contrast Ratio(K)} = \frac{\text{Brightness of selected dot} \\ (\text{White patterned area}) \text{ at } 250\text{cd/m}^2}{\text{Brightness of non-selected dot} \\ (\text{Black patterned area}) \text{ at } 250\text{cd/m}^2}$$

Note 3) Optical measuring system : temperature regulated chamber

Note 4) Life Time

The elapsed time that the full white brightness decreases to the half of initial value.

11. Quality Level

11-1. Environment Condition

The environmental conditions for inspection shall be as follows.

① Temperature & Humidity

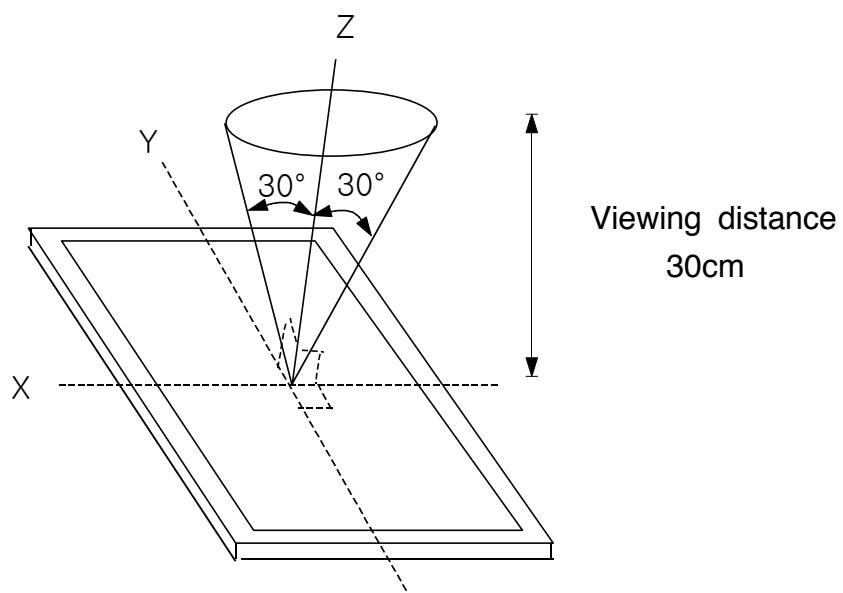

Room temperature : $22 \pm 3^\circ\text{C}$

Humidity : $65 \pm 20\%\text{RH}$

② Viewing distance : 30cm

Viewing angle(tolerance) : $\pm 30^\circ$

③ Visual Inspection Condition : 200cd/m^2 , 150 ± 50 lux

11-2. Sampling Procedures for each item's acceptance table

Defect type	Sampling Procedures	AQL
Major Defect	MIL-STD-105D Inspection level I normal inspection single sample inspection	0.65
Minor Defect	MIL-STD-105D Inspection level I normal inspection single sample inspection	0.65

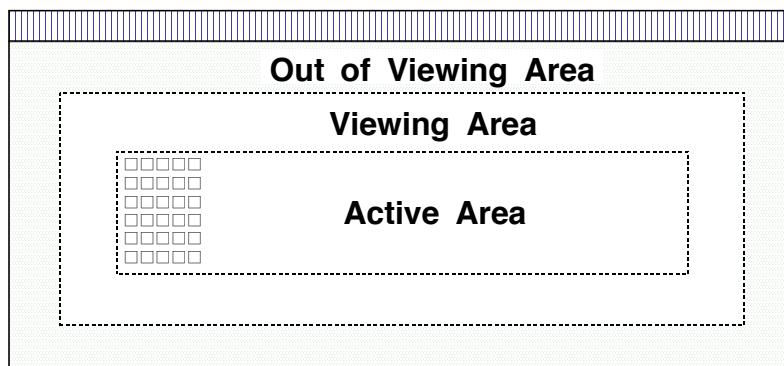

① Major defect

A major defect refers to a defect which may substantially degrade usability for product applications.

② Minor defect

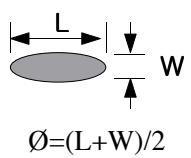

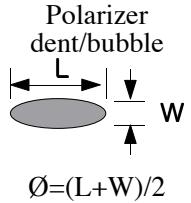

A minor defects refers to a defect which is not considered to substantially degrade product application, or a defect which deviates from existing standards almost unrelated to the effective use of the product or its operation.

③ Defect application zone : Active Area + Viewing Area

Defect in "Out of View Area" Zone should not be judged.

12. Reliability

12-1 Items of reliability

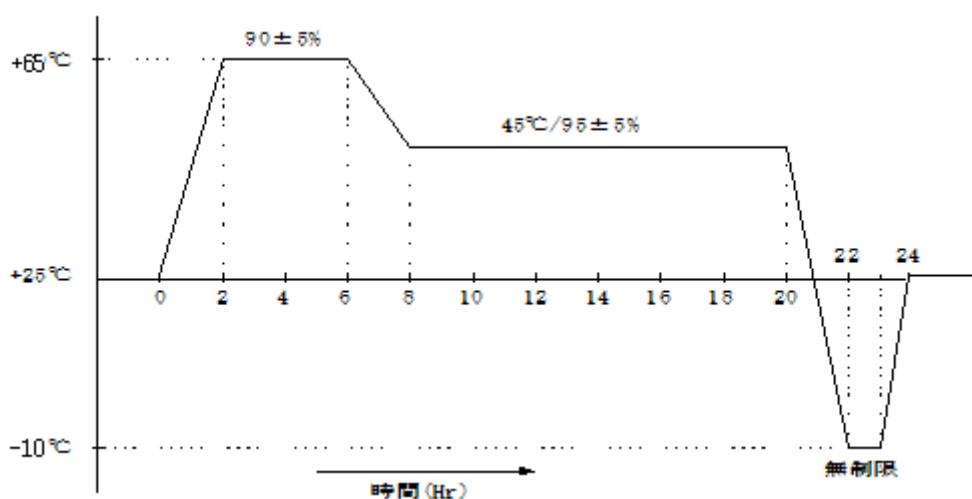

- : All test result of items should be judged in 2 hours recovery time at room temperature.
- : All environmental operating reliability Item do test rolling pattern as below.

[Note] Brightness condition : 250cd/m²

No	Item	Condition	Criterion
1	High Temperature Operating	70°C 72hrs	After testing,cosmetic and electrical defects should not happen. (spec in)
2	Low Temperature Operating	-30°C 72hrs	
3	High Temperature Storage	85°C 72hrs	
4	Low Temperature Storage	-40°C 72hrs	
5	Thermal Shock	- 40°C ↔ 85°C 72hrs	
6	Temperature Humidity Cycle	-10 ~ 65°C, 90~95% 72hrs	
7	Static Electricity	150pF 330Ω	- (Note1) After testing,cosmetic and electrical defects should not happen.
8	Static push	30N / Center point, 2mm/min	After testing,cosmetic and electrical defects should not happen.
9	4 point bending	5mm/min	B10 over 100MPa (face up/down)
10	Peel strength	50mm/min	MIN 5N/cm↑
11	Module combined (Height storage/Packing vibration/Packing drop)	0.5atm 2hr / 1.047Grms / Z axis(60min)_X,Y axis (30min) / 1corner, 3edge, 6face	After testing,cosmetic and electrical defects should not happen.

Note 1 Temperature Humidity Cycle Test

Note 2 ESD

In case of malfunction defect caused by ESD damage, if it would be recovered to normal state after resetting, it would be judged as a good part.

13. Handling Precautions

13-1. Mounting Method

The AMOLED panel of SAMSUNG SMD CO.,LTD. module consists of two slim glasses with polarizer which can easily get damaged. Since the module is constructed as to be fixed by utilizing fitting holes in the printed circuit board. Extreme care should be used when handling the AMOLED modules.

13-2. Caution of AMOLED Handling and Cleaning

When cleaning the display surface, use soft cloth solvent as recommended below and wipe gently.

- ◎ Isopropyl alcohol
- ◎ Ethyl alcohol
- ◎ Trichlorotrifluoroethane

Do not wipe the display surface with dry or hard materials that will damage the polarizer surface. Do not use the following solvent.

- ◎ Water
- ◎ Ketone
- ◎ Aromatics

Do not wipe ITO pad area with the dry or hard materials that will damage the ITO patterns.

Do not use the following solvent on the pad and prevent it from being contaminated.

- ◎ HCFC
- ◎ Soldering flux
- ◎ Chlorine(Cl), Sulfur(S)
- ◎ Spittle, Fingerprint

If the product is not wrapped with a desiccant added pad, ITO pattern can be damaged by corrosion. SAMSUNG SMD CO.,LDT. suggests wrapping a product with a desiccant unless customers particularly indicate that they do not want it. In case ITO pattern corrodes due to the usage of chlorine, sulfur or customer's mishandling of the product, the responsibility lies with the customer.

13-3. Caution Against Static Charge

For AMOLED module, use C-MOS LSI drivers, therefore we recommend that you ;

Connect any unused input terminal to Vdd or Vss, do not input any signals before power is turned on, and ground your body, work/assembly areas, assembly equipment to protect against static electricity. It could occur static electricity when taping off the film which protects AMOLED.

Against static charge, you should make sure that the product is safe or not by experiment in advance.

13-4. Packing

- ◎ The packing principle is that AMOLED module should keep its packing condition at the time of delivery. When storing the AMOLED after unpacking, note the followings.
- ◎ AMOLED module is consisted of GLASS and assemblies. It should avoid pressure, strong impact, and being dropped from a height.

---------------------------	--	------------	-------

- ◎ To prevent modules from degradation, do not operate or store them in a place where they are directly exposed to sunlight or high temperature/humidity.

13-5. Caution for Operation

- ◎ If you do not follow normal POWER ON , OFF sequence or abnormal operating, then AMOLED module can be damaged electro-optically and does not recover.
- ◎ Response time may extremely delay at a temperature lower than operating range, AMOLED does not normally operate at a high temperature. But this may recover at a proper temperature.
- ◎ When you set optimal operating voltage to AMOLED module, you can see the optimal contrast of AMOLED. So, add voltage controllable function at SET Module.
- ◎ AMOLED module may not display normally when twisting power or pressing power is added. Therefore you should secure AMOLED module maximum thickness at set assembly not to have any pressure affect AMOLED module.
- ◎ Electro-chemical reaction may occur when there is humidity on pad, therefore, you should use AMOLED Module below maximum operating humidity.
- ◎ AMOLED Module Power Vdd should be designed to protect surge current at SET Module.
- ◎ You should not damage connector and cable for AMOLED module assembly by force folding or by applying extreme power.
- ◎ AMOLED may not display normally when it is interfered by surrounding elements, therefore you should consider setting design not to damage AMOLED module by surrounding elements.
- ◎ To satisfy EMI standards, you should plan your design after considering emitting energy.
- ◎ We can not guarantee display characteristics outside viewing area, therefore your set window should be fixed into viewing area.
- ◎ Image-sticking may occur if AMOLED displays same image for a long time, so you need to make a change for AMOLED.

13-6. Storage

- ◎ Place in a dark place where neither exposure to direct sunlight or any fluorescent light is permitted and keep at room temperature & room humidity.
- ◎ Store with no contact with polarizer surface.
[It is recommended to store them as they have been contained in the inner container when we delivered them.]

13-7. Safety Precautions

- ◎ Disassembly or modification may cause electric shock, damages to sensitive part inside of the AMOLED module, dust adhesion, or scratches on the display part.
- ◎ In the event that the contents of AMOLED module are on skin, wipe them with a paper towel or gauge and wash the part well, and receive medical attention if necessary.
- ◎ Do not use the AMOLED module for the special purpose besides display units.

- ◎ Be careful of the glass chips that may cause injury to fingers or skin, when the display part is broken.

13-8. Precautions before Use

You should discuss the following case with SAMSUNG SMD CO., LTD.

- ◎ in case of any questions about contents of this "Specification For Approval".
- ◎ in case of occurring new problems not mentioned at this "Specification For Approval".
- ◎ in case of your request about income inspection specification change.
- ◎ in case of occurring new problem at your driving test.

14-3. Packing specification

14-3-1. Packing a Carton Box (C-Type)

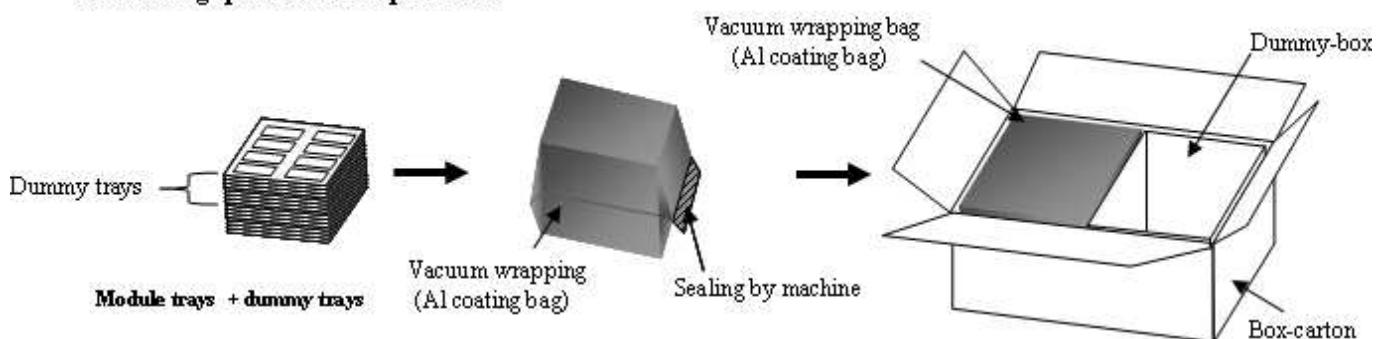

Part	Quantity	Module (Panel)
Tray	21 * 2	6/ Tray
Cover Tray	2 EA	0 / Tray
Packing-Bag	2 EA	6 * 21/ Bag
Divider	1 EA	-
Box-Carton	1 EA	252 / Box-Carton

Note

- (1) Total : Box-carton approx. : (00)kg
- (2) Size :583(W) x 388(D) x 210(H)
- (3) Place the panels in the tray facing up direction.
- (4) Stack the trays and cover (dummy) tray.
- (5) Wrap the Al coating bag by vacuum sealing machine.
- (6) Put the bags in the box-carton with divider.
- (7) Seal the box-carton and affix the label-safety.

* Packing spec. for small quantities

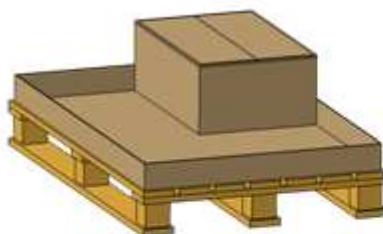

Note

- (1) When package quantity is small, panels containing trays are stacked the bottom, and dummy trays are stacked at the top of package, then wrap the Al coating bag by vacuum sealing machine
- (2) When only one tray bag (Vacuum wrapping bag) is available, dummy box is inserted into the vacant space

14-3-2. Packing a Pallet Box

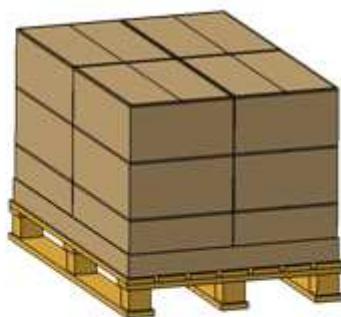

Part	Quantity
Pallet	1 EA
Sleeve Bottom	1 EA
Sleeve Box	1 EA
Sleeve Cap	1 EA

①

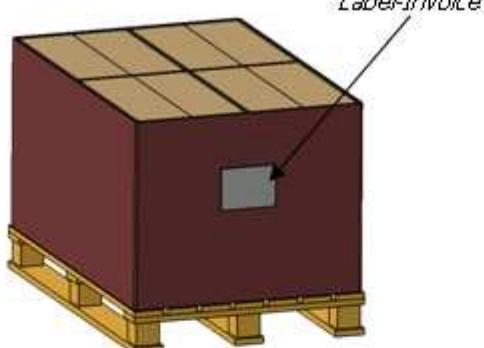

- Load sleeve bottom on a pallet

②

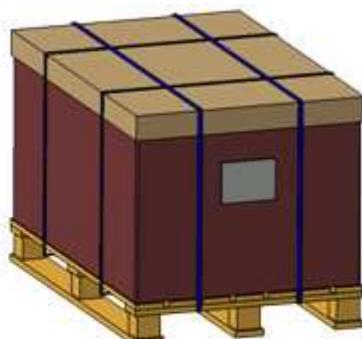

- Load 12EA carton boxes

③

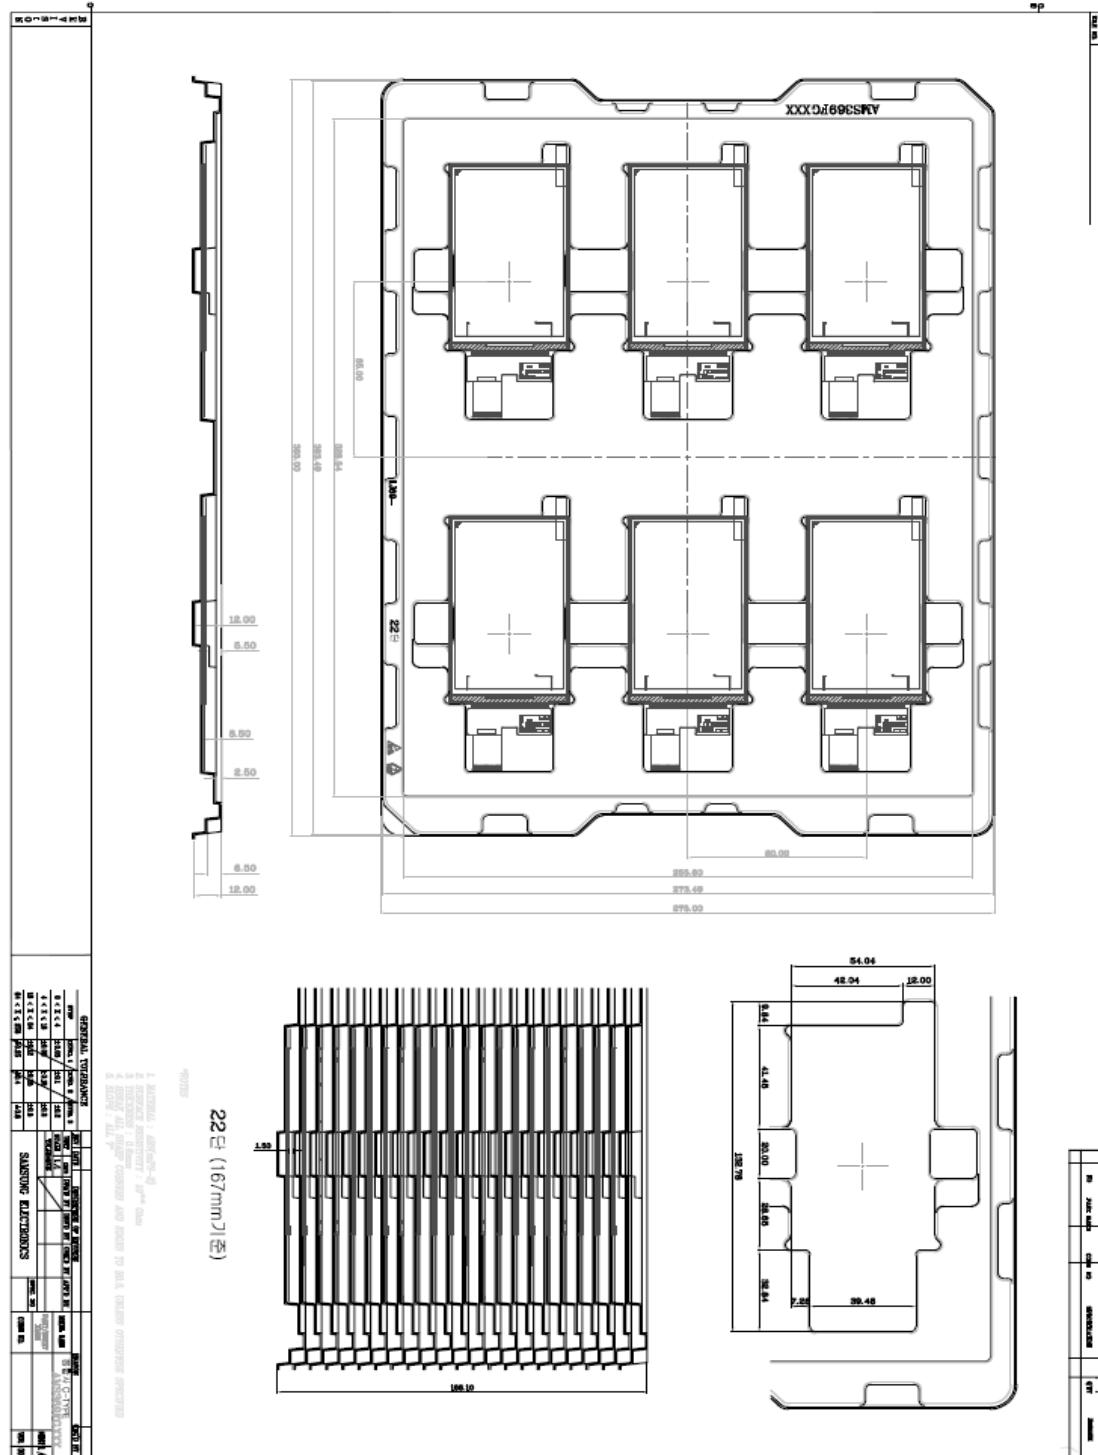

- Cover a packing box

④

- Cover a sleeve cap
- Taping and Warping
- Label-Invoice 4EA
- Label-safety 4EA
