**SII's TFT Modules**

SII develops, produces and markets TFT standard modules for a broad range of customer applications!

---

**Touch Panel**
- Resitive Touch Panel
- Capacitive Touch Panel

**Front Glass**
- Custom printing is available

**Backlight**
- Vivid and Beautiful Panel
- Various Sizes from 2 inch to 7 inch
- SII Original Backlight
- High Luminance/High Saturation

**Driver IC**
- Maximum performance IC chosen for each LCD type

**FPC**
- Semi-custom FPC is available

---

Advanced Technical Information

**LCD**

**LCD panel type**
SII manufactures a variety of LCD module types – providing clients the best options for their intended applications.

<table>

---

**Unique Bonding**
SII has a unique bonding technique ADB (Airless Direct Bonding), ADB enables low-cost but high-quality bonding. We also offer custom bonding with client specific touch panels or front glass overlays.

**Features**
- **High Sunlight Readability**
  SII’s LCD direct bonding process ensures very good sunlight readability by effectively managing reflectivity.
- **Slim**
  SII’s Bonding process enables both a thin and strong LCD module.
- **High Reliability /Durability**
  SII’s Bonding process increases the impact strength of the LCD Module.
- **Dust-less**
  SII’s Bonding process eliminates dust between the LCD and front glass/touch panel.

---

**Backlight**
Choose best LCD with SII’s original backlight “M-DANNY” and “Ti-SOL”!

**M-DANNY**
Simple structure without a prism sheet. M-DANNY enables an even light distribution and clear LCD panel, while offering slim packaging.

**Ti-SOL**
SII’s original Ti-SOL film widens the NTSC ratio more than 100%.

---

**Capacitive Touch Panel**
SII develops, produces and markets capacitive touch panel modules – either integrated with one of our LCD Modules or as a stand-alone product offering.

**Features**
- **Controller IC Mounting**
  SII prepares the most suitable controller IC for client’s application. Multi-touch or gesture is available depend on the controller IC.
- **Shape Customizing**
  SII processes the glass shape according to client’s request.
- **Bonding Option**
  Bonding is available with SII’s LCD or client specific LCD.
- **Matching Support with LCD**
  SII supports the matching with LCD including noise cancellation.

---

**Conclusion**

- Thin package, High brightness, High saturation
- SII’s eco-friendly LCD Module
- Advanced Technical Information
- LCD panel type
- Unique Bonding
- Capacitive Touch Panel
- Backlight

Environmental Activities

SII Group Environmental Policy
Environmental Concept
As a good corporate citizen, the SII Group will continue to harmonize its corporate activities with the global environment, protect and improve the environment, and contribute to the establishment of a sustainable society that can coexist with all nature.

[SII LCD Environmental Policy]
SII LCD Device is implementing the energy-saving actions, the reduction of waste, the reduction of hazardous materials, the effective use of paper resources and the development of environmental friendly products based on the SII Group Environmental Policy.

[Four Specific Actions to Protect the Environment from SII LCD Device]
1. Energy Saving
   - Energy Saving in Manufacturing Process
     Our factories, which manufacture our products, are implementing energy saving procedures in their manufacturing process.
   - Energy Saving through Low Power Consumption
     By design, LCD Device is an energy saving product. We are continuously improving.
     Our products for lower current consumption, resulting in further energy saving.

2. Resource Saving
   We set the resource saving targets and control the amount of raw materials, water used in processing, office resource and indirect materials in both the factory and our administrative offices.

3. Manufacturing an Environmentally Friendly Product
   - RoHS Compliance*1 and other nations’ directive (including REACH: Registration, Evaluation, Authorization and restriction of Chemicals)
     Before adopting new materials or processes, we make sure the material or process is not using any prohibited or restricted materials including RoHS designation. (The RoHS Directive has some exemptions. Some materials might be applied to them.)
     *1 The RoHS Directive stands for: [The Restriction of the use of certain Hazardous Substances in Electrical and Electronic Equipment]
     This is a directive which the EU (European Union) set for the restriction of the use of certain hazardous substances in electrical and electronic device and equipment, and it was issued in February 2003 together with the WEEE Directive. Accordingly, the directive has banned the use of the certain 6 substances in EU member nations since July 2006.
   - Halogen free
     Incinerating Plastics with halogen elements (which also include bromine or chlorine) produce poisonous gases (dioxin). We are addressing the demand for Halogen Free products and aim to manufacture these eco-friendly products. (Halogen free products are presently custom only)

   - Compliant with SII Green Product Label
     To raise public awareness of our eco-friendly products, SII introduced the SII Green Product Label System.
     All the LCD Device products satisfy certain criteria and are certified as SII Green Products.

4. Green Purchase
   We promote "Green Purchase" along with "Green Purchase Guidelines". These are two innovative programs established by SII Group.
